### VIA RESS AND COURIER

Ms. Christine E. Long Registrar and Board Secretary Ontario Energy Board 2300 Yonge Street 26th Floor, Box 2319 Toronto, ON M4P 1E4

Dear Ms. Long;

### RE: APPLICATION BY ALECTRA UTILITIES CORPORATION FOR DISTRIBUTION RATES EFFECTIVE JANUARY 1, 2020 (EB-2019-0018) – DRAFT RATE ORDER

On May 28, 2019, Alectra Utilities filed an application with the Ontario Energy Board ("OEB" or the "Board") under Section 78 of the *Ontario Energy Board Act, 1998* as amended and pursuant to the OEB's *Filing Requirements for Incentive Rate-setting Applications* seeking approval for electricity distribution rates, and other charges, effective January 1, 2020. The Board assigned File Number EB-2019-0018 to the Application.

The Board issued a Partial Decision and Order (the "Partial Decision") in this matter on January 30, 2020. The Board directed Alectra Utilities to file a Draft Rate Order by February 10, 2020, that incorporates the OEB's determinations in the Partial Decision; and to file detailed supporting material, including all relevant calculations showing the impact of the implementation of the Partial Decision on rates and rate riders, including bill impacts.

In accordance with the Partial Decision, Alectra Utilities provides its Draft Rate Order which incorporates the information directed by the Board from the Partial Decision. The Draft Rate Order includes a proposed Tariff of Rates and Charges and the customer rate impacts for the Horizon Utilities rate zone, a draft accounting order for the capitalization deferral account for the Guelph rate zone and detailed information in support of the calculation of the 2017 ESM rate riders for the Horizon Utilities rate zone.

Included in this Draft Rate Order are the following Attachments:

### Horizon Utilities RZ

- Attachment 1: HRZ 2020 Proposed Tariff of Rates and Charges
- Attachment 2: HRZ Bill Impacts
- Attachment 3: HRZ 2017 Earnings Sharing Mechanism Rate Rider Calculation
- Attachment 4: Draft Accounting Order GRZ

The following "live" Excel models also accompany the Draft Rate Order:

- HRZ 2017 Earnings Sharing Mechanism Rate Rider Calculation HRZ RGM Model
- HRZ RGM Model

Two hard copies of the Draft Rate Order will be delivered to the OEB via courier. An electronic copy of the Draft Rate Order and a live Excel version of the Excel Models are being filed using the Board's RESS filing system.

Should you have any questions or require additional information, please do not hesitate to contact me.

Yours truly,

### [Original Signed By]

1IN THE MATTER OF the Ontario Energy Board Act, 1998, being2Schedule B to the Energy Competition Act, 1998, S.O. 1998, c.15;3AND IN THE MATTER OF an Application by Alectra Utilities4Corporation to the Ontario Energy Board for an Order or Orders5approving or fixing just and reasonable rates and other service6charges for the distribution of electricity as of January 1, 2020.

## 8 9

# M-FACTOR AND CAPITALIZATION POLICY DRAFT RATE ORDER DELIVERED: February 10, 2020

### 10

# 11 INTRODUCTION

Alectra Utilities Corporation ("Alectra Utilities" or the "Applicant") filed an Incentive Rate-setting 12 Mechanism ("IRM") application with the Ontario Energy Board ("OEB" or the "Board") on May 28, 13 14 2019 under section 78 of the Ontario Energy Board Act, 1998, ("OEB Act") seeking approval for 15 changes to its electricity distribution rates to be effective January 1, 2020. As part of this 16 Application, Alectra Utilities filed its first five-year Distribution System Plan ("DSP") on an 17 integrated basis for its entire service area. Alectra Utilities requested approval for capital funding based on a rate-adjustment mechanism that reconciles the capital needs set out in the DSP with 18 the capital-related revenue in rates (the "M-factor"); and the termination of the capitalization policy 19 20 deferral accounts established in EB-2017-0024.

21

22 The following nine parties requested and were granted intervenor status:

- Association of Major Power Consumers in Ontario ("AMPCO");
- Building Owners and Managers Association of Greater Toronto ("BOMA");
- Consumers Council of Canada ("CCC");
- Distributed Resource Coalition ("DRC");
- Energy Probe Research Foundation ("Energy Probe");
- Power Workers' Union ("PWU");
- School Energy Coalition ("SEC");
- Max Aicher (North America) Ltd. and Max Aicher (North America) Bloom Mill (collectively,
- 31 "MANA"); and
- Vulnerable Energy Consumers Coalition ("VECC").

In Procedural Order ("PO") No. 1, the OEB determined that it would process the three elements 1 2 of the application, namely the IRM, M-factor, and capitalization policy, in different stages. On December 12, 2019, the OEB issued its Partial Decision and Interim Rate Order on the IRM 3 4 elements in this application. On January 30, 2020, the OEB issued its Partial Decision and Order 5 on the M-factor and capitalization policy elements in this application. 6 Alectra Utilities submits this Draft Rate Order which incorporates the Orders of the Board in its 7 8 Partial Decision. The issues presented in this Draft Rate Order are organized in the manner that 9 these issues are set out in the Board's Partial Decision. 10 11 Included in this Draft Rate Order are the following Attachments: • Attachment 1: HRZ Tariff of Rates and Charges 12 • Attachment 2: HRZ Bill Impacts 13 14 Attachment 3: HRZ 2017 ESM Rate Rider Calculation Attachment 4: Draft Accounting Order GRZ 15 16 17 The following "live" Excel models also accompany the Draft Rate Order: 18 • HRZ 2017 ESM Rate Rider Calculation HRZ Rate Generator Model ("RGM") 19 • 20 **DECISION SUMMARIZED BY ISSUE** 21 22 As identified above, the issues presented in this Draft Rate Order are organized in the manner 23 that they were set out in the Board's Partial Decision. The OEB's Partial Decision is presented 24 first, with Alectra Utilities' action taken as per the Partial Decision immediately thereafter. 25 26 1. M-factor Alectra Utilities requested OEB approval of \$265MM in incremental capital funding through the 27 M-factor, and two associated variance accounts: the Capital Investment Variance Account 28 29 ("CIVA") and the Externally Driven Capital Variance Account ("EDCVA").<sup>1</sup> Alectra Utilities' M-

<sup>&</sup>lt;sup>1</sup> In its reply submission, Alectra Utilities withdrew its request for the EDCVA.

- 1 factor proposal was underpinned by a consolidated five-year DSP filed by Alectra Utilities as part
- 2 of its application.
- 3

# 4 Board Findings – as per page 21 of the Partial Decision

- 5 *"The OEB denies Alectra Utilities' M-Factor proposal, including its proposed CIVA and EDCVA,* 6 *for the following reasons:*
- The M-Factor proposal is inconsistent with the OEB's rate-setting policies and MAADs
   policy and the deviation from policies is not warranted
- The M-Factor proposal does not produce just and reasonable rates
- The methodology utilized to seek customer preferences does not fully support the M-Factor"
- 12

At page 28 of the Partial Decision, the OEB provided the following three options for Alectra
Utilities' consideration related to requests for incremental capital funding:

- 15 1. File a cost-based application for rates effective in 2021 proposing updated capital 16 requirements, in which case the rebasing deferral period would be terminated;
- Amend the current application to request incremental capital funding in 2020 for projects
   that meet the ICM criteria. Further, the OEB provided that Alectra Utilities may consider a
   multi-year ICM; and
- 3. File an application for 2021 rates, in which Alectra Utilities would be eligible to request
   incremental capital funding through an ICM.

Alectra Utilities is currently evaluating the proposed options and will file a letter with the OEB byno later than February 27, 2020.

24

# 25 2. Capitalization Policy

Alectra Utilities conformed its capitalization policy in 2017, as a result of the consolidation through which Alectra Utilities was formed, and as required under the International Financial Reporting Standards ("IFRS") to align the capitalization policies for the Alectra Utilities RZs. For the predecessor companies that formed Alectra Utilities, PowerStream is the acquirer in accordance with IFRS 3 and IFRS 10. Consequently, Alectra Utilities adopted the PowerStream capitalization policy. During the 2018 EDR proceeding (EB-2017-0024), in its Decision and Partial Accounting Order, issued December 20, 2017, the OEB established three new deferral accounts to track the change in capitalization policy for the Horizon Utilities, Enersource and Brampton RZs. Further, in the 2018 EDR Decision and Order, issued April 6, 2018, the OEB determined that the impact of the capitalization policy change for the Horizon Utilities RZ will be dealt with through the Earnings Sharing Mechanism ("ESM") for the remainder of the Custom IR term.

7

8 In its current application, Alectra Utilities requested that the capitalization-related deferral 9 accounts for the Enersource, Brampton, and Horizon Utilities RZs be closed without clearing their 10 balances, or that their balances be disposed to Alectra Utilities.

11

In the Decision and Order, issued September 5, 2019, the OEB found that Alectra Utilities' request to reverse the outcome of its previous decision to establish the three capitalization deferral accounts can be characterized as a motion to vary the decision and that the request did not meet the threshold test for such a motion.

16

17 As part of its September 5, 2019 Decision, the OEB reiterated that its Decision on Confidentiality and PO No. 3 in Alectra Utilities' 2019 Electricity Distribution Rate Application (EB-2018-0016), 18 required Alectra Utilities to present different options for disposition of the capitalization related 19 deferral accounts, including, options proposed by parties in the 2018 proceeding; and options 20 21 involving adjustments to rate base. Further, in its current Decision, the OEB clarified that different 22 options could also relate to: the calculation of the balances; the distribution of the balances amongst customer classes; the billing determinants to be used; and the timing and duration for 23 24 the disposition.

25

# 26 2.1 Capitalization Policy Deferral Accounts

27

# 28 2.1.1 Capitalization Policy: Calculation of Balances

Alectra Utilities determined the impact of the capitalization policy change based on the difference between the revenue requirement calculated using pre-merger capitalization policies and the revenue requirement calculated with the new capitalization policy. The revenue requirement was calculated each year based on actual OM&A, depreciation expense, income tax and PILs, and return on capital (debt and equity).

#### Board Findings – as per page 35 of the Partial Decision 1

"The OEB adopts the Account 1576 approach to the deferral accounts for the change in 2 capitalization policy. The Account 1576 approach was first adopted in 2012, and amended in 3 2013, to record financial differences arising from accounting changes on the transition to IFRS." 4 5

6 Alectra Utilities has updated its calculation of the impact of the capitalization policy change based on the Account 1576 approach. The updated calculation also excludes any impact for the Horizon 7 Utilities RZ during the Custom IR term (2015-2019), the PowerStream RZ over the rebasing 8 deferral period and the Guelph RZ for the 2019 rate year. The above adjustments are addressed 9 in subsequent sections of this Draft Rate Order. 10

11

12 Table 1 below provides an updated forecast of the impact of the change over the deferred

rebasing period. 13

Capitalization Policy Impact (\$000s)	2017_Act	2018_Act	2019	2020	2021	2022	2023	2024	2025	2026	2027	2028	2017-2028

### **1** Table 1 – Net Impact of Capitalization Policy Change (Account 1576 Approach)

2 3

### 4 2.1.2 Capitalization Policy: Nature, Timing, and Duration of Account Dispositions

5 In its November 28, 2019 Reply Submission, Alectra Utilities submitted that a one-year disposition period, commencing at Alectra

6 Utilities' next rebasing application is appropriate. Alectra Utilities stated that the cumulative balances are similar in size to Alectra

7 Utilities' Group 1 accounts, for which no rate mitigation was required in its most recent dispositions. In the event that the OEB

decides that delaying disposition may impact customers, Alectra Utilities submitted that
disposition should occur every 5 years, consistent with the regular disposition cycle for Group 2
accounts.

4

### 5 **Board Findings – as per page 37 of the Partial Decision**

6 "Consistent with the Account 1576 approach, the OEB agrees that disposition at the next rebasing is appropriate. The OEB concludes that the duration of the disposition is best determined at the 7 8 time of rebasing so the impact on rates to customers and cashflow to the utility can be considered 9 based on the most up-to-date information. The Account 1576 approach requires a rate of return component to be applied to the balance in the deferral account before disposition. The return 10 11 component captures the return on capital that is earned between the start of the rebasing year and the date that the principal balance is fully amortized (end of the disposition period). Therefore, 12 13 it cannot be calculated until the disposition period is determined. The OEB is adopting the same approach for the current capitalization deferral accounts. The weighted average cost of capital to 14 be used and the rate of return component will be determined at the time the accounts are 15 disposed. Consistent with the Account 1576 approach, since a return component is applied upon 16 17 disposition, no additional carrying charges should be calculated on the capitalization deferral accounts. Any carrying charges recorded to date on these accounts should be reversed." 18

19

Alectra Utilities confirms that it has reversed all carrying charges recorded to date on these accounts.

22

### 23 2.1.3 Capitalization Policy: Tracking of Capitalization Policy Impacts from 2019 to 2028

24 Alectra Utilities indicated that, as of July 2019, the Brampton, Horizon Utilities, PowerStream and 25 Enersource RZs have successfully migrated to a new consolidated Enterprise Resource Planning ("ERP") system. As a result, it will no longer be able to track the actual impacts of the change in 26 27 accounting policy for each RZ without the costly maintenance of separate accounting systems. Alectra Utilities has proposed an allocation methodology to determine the capitalization policy 28 29 impacts for each RZ starting with the 2019 fiscal year. In its November 29, 2019 Reply 30 Submission, Alectra Utilities submitted that maintaining separate systems for tracking purposes 31 would leave it arbitrarily penalized for pursuing synergies that the OEB encouraged in the MAADs Decision. 32

### 1 Board Findings – as per page 38-39 of the Partial Decision

2 "The OEB finds Alectra Utilities' approach to allocations acceptable based on the information provided in this proceeding. Allocation methodologies are not an exact science, and typically there 3 4 are a number of different approaches that can be applied. Alectra Utilities is now a merged utility seeking to pursue synergies. One of these has been to consolidate to a new ERP. As a result, 5 6 estimates are required to allocate financial information to each RZ. The OEB accepts this approach. However, the OEB concludes that it is appropriate to continue to monitor the results of 7 8 the allocation methodology for unexpected results that might lead to the conclusion that an 9 amendment is required to the allocation approach on a prospective basis."

10

11 Alectra Utilities will report on the actual balance in the capitalization deferral accounts as part of

12 its annual IRM application, and reconcile such to the RRR balances for account 1508.

13

### 14 2.1.4 Capitalization Policy: Guelph RZ

15 Following the amalgamation between Alectra Utilities and Guelph Hydro, the accounting policies

of legacy Guelph Hydro were revised to match those of Alectra Utilities, effective January 1, 2019,
 in conformance with IFRS.

18

Consistent with the treatment of tracking the capitalization policy impacts in the other applicable
 RZs, Alectra Utilities confirmed that it intends to request the establishment of a deferral account

for the Guelph RZ to track the impact of the capitalization policy change.

22

## 23 **Board Findings – as per page 39 of the Partial Decision**

"Alectra Utilities provided details of the change in capitalization policy for Guelph resulting from
its merger with Alectra Utilities in 2019. The OEB is establishing a deferral account for the Guelph
RZ on the same basis as the deferral accounts for the other RZs. Alectra Utilities is required to
provide a draft accounting order as part of the draft rate order stage of this proceeding.

28

29 The rates for the Guelph RZ were not set interim in 2019, and no deferral account was established

30 for 2019. Therefore, the capitalization deferral account for the Guelph RZ will be effective January

31 *1, 2020.*"

1 Alectra Utilities confirms that no entries will be recorded in the capitalization deferral account for

the Guelph RZ in 2019. Alectra will track the impact for the Guelph RZ effective January 1, 2020.

3 Alectra Utilities has filed a draft accounting order for the capitalization deferral account for the

4 Guelph RZ, as Attachment 4.

5

## 6 2.1.5 Capitalization Policy: PowerStream RZ

In its pre-filed evidence, and as updated during the proceeding, Alectra Utilities provided the 7 8 forecasted impacts of the capitalization policy change over the deferred rebasing period. This 9 included forecasted impacts for the PowerStream RZ. In response to technical conference undertaking JT. Staff-7 in Alectra Utilities' 2018 EDR Application (EB-2017-0024), Alectra Utilities 10 11 confirmed that the capitalization policy for the PowerStream RZ did not change post-merger. Further, as part of Alectra Utilities' accounting policy review process, a difference was identified 12 13 for the PowerStream RZ due to a reclassification of costs between burden pools based on a change in estimate, and not a change in accounting policy. 14

15

## 16 **Board Findings – as per page 40 of the Partial Decision**

<sup>17</sup>*"It is not clear to the OEB whether Alectra Utilities provided the details with respect to the* <sup>18</sup>*PowerStream RZ because it is proposing this be recorded in a deferral account, or that the details* <sup>19</sup>*were provided for illustrative purposes. In the 2019 rate application, Alectra Utilities stated that* <sup>20</sup>*the amounts were the result of a change in estimate, requiring a reclassification of costs between* <sup>21</sup>*burden pools for the PowerStream RZ. The OEB has not typically established deferral accounts* <sup>22</sup>*for changes in accounting estimates and is not establishing one at this time."* 

23

Alectra Utilities confirms that the impacts for the PowerStream RZ, similar to the impacts presented for the Horizon Utilities RZ over the 2017-2019 period, were for illustrative purposes. Alectra Utilities confirms that PowerStream RZ's capitalization policy did not change post-merger. Similarly, for the Horizon Utilities RZ, although the impacts were presented in the model for 2017 to 2019, Alectra Utilities flowed the impact of the capitalization policy change through the ESM in accordance with the OEB's direction.

30

## 31 2.1.6 Capitalization Policy: Adoption of IFRS 16 Leases

In its November 28, 2019 Reply Submission, Alectra Utilities reiterated that, as demonstrated in

response to capitalization policy interrogatory G-Staff-1, it has shown that that the impacts from

the implementation IFRS 16 are immaterial and have no bearing on future rates at rebasing. Alectra Utilities' total lease is comprised of building leases, the most recent of which commenced in 2011, and Alectra Utilities confirmed it does not intend to enter into any new capital leases during the planning period. Alectra Utilities noted also that all current capital leases will be fully amortized by the end of 2025. For these reasons, Alectra Utilities submitted that it should not be required to file additional details in its 2021 rate application, nor should it be required to establish deferral accounts to track the impact.

8

## 9 Board Findings – as per page 41 of the Partial Decision

10 *"The information provided by Alectra Utilities indicates that the impact of the change from the* 

11 IFRS 16 standard is not material. The OEB is therefore not establishing any accounting direction

- 12 related to this matter at this time."
- 13
- 14 There is no further action required by Alectra Utilities as a result of these Board findings.
- 15

## 16 2.2 Horizon Utilities RZ Custom IR Application

17

## 18 2.2.1 Horizon Utilities RZ ESM

The Horizon Utilities Settlement Agreement provides for a deferral account for earnings in excess of the OEB's annual approved regulatory return on equity ("ROE").<sup>2</sup> Earnings in excess of the approved ROE are divided on a 50/50 basis with Horizon Utilities RZ ratepayers. Further, as directed in the OEB's Decision and Order in Alectra Utilities' 2018 EDR (EB-2017-0024) Application, Alectra Utilities has flowed the impact of the capitalization policy change through the ESM for the Horizon Utilities RZ for 2017 and 2018.

25

In this proceeding, Alectra Utilities reported on its ESM results for 2017 and 2018 for the Horizon Utilities RZ. Alectra Utilities has calculated an achieved ROE of 10.038%, and earnings sharing in the amount of \$1.3MM for 2017, given that the calculated ROE is greater than the approved ROE of 8.78% for 2017. Alectra Utilities has calculated an achieved ROE of 8.368%, and earning sharing of nil for 2018, given that the calculated ROE is lower than the approved ROE of 9.00% for 2018.

<sup>&</sup>lt;sup>2</sup> Settlement Proposal, pp. 11 and 12.

### **1** Board Findings – as per page 41 of the Partial Decision

2 "The OEB previously determined that the method for addressing the capitalization policy change for the Horizon RZ would be through the ESM until the end of the Custom IR term. The OEB is 3 not amending that approach. As discussed previously, allocation methodologies are not an exact 4 5 science, and different approaches can be adopted. The OEB notes that Alectra Utilities itself did 6 not over earn in 2017 and 2018. The OEB is setting just and reasonable rates and is doing so by balancing the interests of the utility and ratepayers. The OEB is therefore accepting Alectra 7 8 Utilities' approach to earnings for 2017 and 2018. The earnings to be shared for the Horizon RZ 9 are therefore \$1.302 million for 2017 and \$0 for 2018. As part of the draft rate order process, Alectra Utilities shall file rate riders to return this amount to customers in the Horizon RZ over the 10 11 period from March 1, 2020 to December 31, 2020."

12

Alectra Utilities has filed an updated Tariff of Rates and Charges, Bill Impacts, and 2017 ESM
 Rate Rider Calculation for the Horizon Utilities RZ as Attachments 1, 2, and 3. Alectra Utilities
 has also filed live excel models for the 2017 ESM Rate Rider Calculation and RGM for the Horizon
 Utilities RZ.

17

### 18 2.2.2 Horizon Utilities RZ CIVA

The Horizon Utilities' Settlement Agreement provided for the introduction of a deferral account to refund ratepayers the impact to revenue requirement of the variance in its cumulative capital additions for the period from January 1, 2015 to the end of the relative year, in the event that inservice capital additions be lower than the capital approved in its Settlement Agreement.

Alectra Utilities has requested approval of the 2017 and 2018 capital additions for the purposes

of calculating the entry to the CIVA based on the new post-merger capitalization policy.

25

Alectra Utilities reported 2017 in-service capital additions of \$52.4MM, which are \$6.8MM higher than the forecast additions of \$45.6MM. Alectra Utilities reported 2018 in-service capital additions of \$49.4MM, which are \$2.3MM higher than the forecast additions of \$47.1 million. Since the cumulative in-service capital additions from 2015 to 2018 are higher than the approved forecast from 2015 to 2018, no entry was made to the CIVA.

### **1** Board Findings – as per page 49 of the Partial Decision

"The OEB accepts Alectra Utilities proposal that no amounts are required to be recorded in the
 CIVA for the Horizon RZ for 2019.

4

5 The OEB has reviewed the wording in the settlement proposal accepted by the OEB that states. 6 "Over the term of the plan, if Horizon Utilities spends less than its capital forecast, the reduced revenue requirement impact of this will be returned to customers". Furthermore, the settlement 7 8 proposal requires the variance account to be disposed at the end of the five-year term, not each 9 year of the term. It is clear from Table 3 above that even if the pre-merger capitalization policy is the basis for the CIVA, the total actual capital additions exceed the forecast capital additions from 10 11 the Custom IR application and therefore no entries need to be recorded in the CIVA for 2019. The OEB concludes that this meets the intent of the CIVA." 12

13

14 There is no further action required by Alectra Utilities as a result of these Board findings.

15

### 16 IMPLEMENTATION AND ORDER - as per page 50 of the Partial Decision

17 "The OEB is establishing a deferral account for the Guelph RZ on the same basis as the 18 capitalization deferral accounts for the other RZs. The OEB directs Alectra Utilities to file a draft 19 accounting order as part of the draft rate order stage. Alectra Utilities shall also file updated ESM 20 rate riders to return the 2017 ESM amount to customers in the Horizon RZ over the period from 21 March 1, 2020 to December 31, 2020."

22

"In the draft rate order, Alectra Utilities Corporation shall include customer rate impacts, a draft
 accounting order for the capitalization deferral account for the Guelph rate zone and detailed
 information in support of the calculation of the 2017 ESM rate riders for the Horizon rate zone."

26

Alectra Utilities updated its proposed rates and charges for the Horizon Utilities RZ to reflect the findings in the Board's Partial Decision. The issues presented in this Draft Rate Order are organized in the manner that these issues are set out in the Board's Partial Decision, and each update to rates are identified in each section of this Draft Rate Order. Alectra Utilities has filed a draft accounting order for the Guelph RZ as Attachment 4. Alectra Utilities has filed an updated Tariff of Rates and Charges, Bill Impacts, and 2017 ESM Rate Rider Calculation for the Horizon

- 1 Utilities RZ as Attachments 1, 2, and 3. Alectra Utilities has also filed live excel models for the
- 2 2017 ESM Rate Rider Calculation and RGM for the Horizon Utilities RZ.
- 3

## 4 Horizon Utilities RZ ESM Rate Rider Calculation

- 5 Alectra Utilities has updated the Horizon Utilities RZ ESM rate rider calculation to incorporate the
- 6 following changes:
- Total amount to be returned to customers of \$1.302 million;
- Disposition from March 1, 2020 to December 31, 2020; and
- 9 2018 RRR billing determinants have been used in the calculation of the rate riders to align
- 10 with calculation of rate riders in the OEB's RGM model.

## 11 Table 2 – Horizon Utilities RZ ESM Rate Riders

Horizon Utilities RZ	Pre-filed	Evidence	Draft Rate Order		
Rate Class	Per	Service Charge Rate Rider	Volumetric Rate Rider	Service Charge Rate Rider	Volumetric Rate Rider
Residential	kWh	(\$0.22)		(\$0.36)	
GS<50	kWh	(\$0.34)	(\$0.0001)	(\$0.57)	(\$0.0001)
GS 50-4999 kW	kW	(\$3.16)	(\$0.0213)	(\$5.27)	(\$0.0354)
Large Use	kW	(\$197.51)	(\$0.0117)	(\$328.42)	(\$0.0194)
Large Use with Dedicated Assets	kW	(\$46.71)	(\$0.0028)	(\$77.86)	(\$0.0046)
Unmetered Scattered Load	kWh	(\$0.07)	(\$0.0001)	(\$0.12)	(\$0.0002)
Sentinel Lighting	kW	(\$0.05)	(\$0.1253)	(\$0.08)	(\$0.2089)
Street Lighting	kW	(\$0.02)	(\$0.0443)	(\$0.03)	(\$0.0700)

12

# 13 BILL IMPACTS

14 A summary of the total bill impacts before taxes, for the typical customer by rate class is presented

in Table 1 below, for the Horizon Utilities RZ. These bill impacts are inclusive of the updated ESM

16 rate riders from this Partial Decision, and the previously approved base rates, Group 1 rate riders,

17 and LRAMVA rate riders.

	Тс	otal Bill Impac	ts			
	Before ESM 2019 vs. 2020			With ESM 2019 vs. 2020		
Customer Class	Billing Units	Average Monthly Volume	\$	%	\$	%
Residential	kWh	750	\$2.73	2.0%	\$2.37	1.7%
GS<50	kWh	2,000	\$6.59	1.8%	\$5.82	1.6%
GS 50-4999 kW	kW	250	\$314.05	2.1%	\$299.93	2.0%
Large Use	kW	5,000	\$8,266.93	2.3%	\$7,841.51	2.2%
Large Use with Dedicated Assets	kW	20,000	\$23 <i>,</i> 450.99	1.8%	\$23,281.13	1.8%
Unmetered Scattered Load	kWh	250	\$1.46	3.0%	\$1.29	2.6%
Sentinel Lighting	kW	216	\$414.01	2.1%	\$368.81	1.9%
Street Lighting	kW	4,974	\$8,011.04	2.4%	\$7,662.85	2.3%

### 1 Table 3 – Horizon Utilities RZ Total Bill Impacts (Before HST and Rebate)

2

### 3 CONCLUSION

Alectra Utilities has fully complied with the Partial Decision and has implemented all of the
changes, as directed by the Board in its Partial Decision. Details of the changes are discussed
above and are further supported by the Attachments and live Excel workbooks accompanying
this Draft Rate Order.

EB-2019-0018 Alectra Utilities 2020 EDR Application Draft Rate Order Delivered: February 10, 2020

# Attachment 1

# Horizon Utilities RZ Tariff of Rates and Charges

Approved on an Interim Basis Effective and Implementation Date January 1, 2020 This schedule supersedes and replaces all previously

approved schedules of Rates, Charges and Loss Factors

EB-2019-0018

### **RESIDENTIAL SERVICE CLASSIFICATION**

This classification applies to an account taking electricity at 750 volts or less where the electricity is used exclusively in a separately metered living accommodation. Customers shall be residing in single-dwelling units that consist of a detached house or one unit of a semi-detached, duplex, triplex or quadruplex house, with a residential zoning. Separately metered dwellings within a town house complex or apartment building also qualify as residential customers. All customers are single-phase. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

#### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

Service Charge	\$	27.15
Rate Rider for Recovery of Green Energy Act Related Costs - effective until December 31, 2020	\$	(0.02)
Rate Rider for Disposition of 2017 Earnings Sharing - effective March 1, 2020 until December 31, 2020	\$	(0.36)

approved schedules of Rates, Charges and Loss Factors

### **GENERAL SERVICE LESS THAN 50 KW SERVICE CLASSIFICATION**

This classification applies to a non-residential account taking electricity at 750 volts or less whose average monthly maximum demand is less than, or is forecast to be less than, 50 kW. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

#### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

Approved on an Interim Basis

### Effective and Implementation Date January 1, 2020 This schedule supersedes and replaces all previously

approved schedules of Rates, Charges and Loss Factors

#### **GENERAL SERVICE 50 TO 4,999 KW SERVICE CLASSIFICATION**

This classification applies to a non-residential account whose average monthly maximum demand used for billing purposes is equal to or greater than, or is forecast to be equal to or greater than, 50 kW but less than 5,000 kW. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

#### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES – Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of WMS - Sub-account CBR Class B is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposec through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

### STANDBY POWER SERVICE CLASSIFICATION

This classification refers to an account that has Load Displacement Generation and requires the distributor to provide backup service. Further servicing details are available in the distributor's Conditions of Service.

#### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

#### MONTHLY RATES AND CHARGES – Delivery Component - APPROVED ON AN INTERIM BASIS

GS>50 Standby Charge - for a month where standby power is not provided. The charge is applied to the amount of reserved load transfer capacity contracted or the amount of monthly peak load displaced by a		
generating facility.	\$/kW	2.6595
Large Use Standby Charge - for a month where standby power is not provided. The charge is applied to the		
amount of reserved load transfer capacity contracted or the amount of monthly peak load displaced by a		
generating facility.	\$/kW	1.4569
Large Use with Dedicated Assets Standby Charge - for a month where standby power is not provided. The		
charge is applied to the amount of reserved load transfer capacity contracted or the amount of monthly peak		
load displaced by a generating facility.	\$/kW	0.3454

Approved on an Interim Basis

Effective and Implementation Date January 1, 2020 This schedule supersedes and replaces all previously

approved schedules of Rates, Charges and Loss Factors

### UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION

This classification applies to an account taking electricity at 750 volts or less whose average monthly maximum demand is less than, or is forecast to be less than, 50 kW and the consumption is unmetered. Such connections include cable TV power packs, bus shelters, telephone booths, traffic lights, railway crossings, etc. The level of the consumption will be agreed to by the distributor and the customer, based on detailed manufacturer information/documentation with regard to electrical consumption of the unmetered load or periodic monitoring of actual consumption. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES – Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

approved schedules of Rates, Charges and Loss Factors

### SENTINEL LIGHTING SERVICE CLASSIFICATION

This classification applies to safety/security lighting with a Residential, General Service or Large Use customer. This is typically exterior lighting, and often unmetered. Consumption is estimated based on the equipment rating and estimated hours of use. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

#### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES – Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

#### STREET LIGHTING SERVICE CLASSIFICATION

This classification applies to an account for roadway lighting with a Municipality, Regional Municipality, Ministry of Transportation and private roadway lighting operation, controlled by photo cells. The consumption for these customers will be based on the calculated connected load times the required lighting times established in the approved Ontario Energy Board street lighting load shape template. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

#### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES – Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

#### **MONTHLY RATES AND CHARGES – Delivery Component**

Rural or Remote Electricity Rate Protection Charge (RRRP)

Standard Supply Service - Administrative Charge (if applicable)

Service Charge (per Connection)	\$	1.98
Rate Rider for Recovery of Green Energy Act Related Costs - effective until December 31, 2020	\$	(0.02)
Rate Rider for Disposition of 2017 Earnings Sharing - effective March 1, 2020 until December 31, 2020	\$	(0.03)
Distribution Volumetric Rate	\$/kW	5.2632
Low Voltage Service Rate	\$/kW	0.01702
Rate Rider for Disposition of Lost Revenue Adjustment Mechanism Variance Account (LRAMVA) (2020) -		
effective until December 31, 2020	\$/kW	1.8329
Rate Rider for Disposition of 2017 Earnings Sharing - effective March 1, 2020 until December 31, 2020	\$/kW	(0.0700)
Retail Transmission Rate - Network Service Rate	\$/kW	2.1845
Retail Transmission Rate - Line and Transformation Connection Service Rate	\$/kW	1.9421

approved schedules of Rates, Charges and Loss Factors

### microFIT SERVICE CLASSIFICATION

This classification applies to an electricity generation facility contracted under the Independent Electricity System Operator's microFIT program and connected to the distributor's distribution system. Further servicing details are available in the distributor's Conditions of Service.

#### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

Service Charge	\$	5.40
ALLOWANCES		
Transformer Allowance for Ownership - per kW of billing demand	\$/kW	(0.73)
Primary Metering Allowance for Transformer Losses - applied to measured demand & energy	%	(1.00)

Approved on an Interim Basis

Effective and Implementation Date January 1, 2020 This schedule supersedes and replaces all previously

approved schedules of Rates, Charges and Loss Factors

### SPECIFIC SERVICE CHARGES

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontaric Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

approved schedules of Rates, Charges and Loss Factors

### **RETAIL SERVICE CHARGES (if applicable)**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

Retail Service Charges refer to services provided by a distributor to retailers or customers related competitive electricity.	to the supply	of
One-time charge, per retailer, to establish the service agreement between the distributor and the retailer	\$	102.00
Monthly Fixed Charge, per retailer	\$	40.80
Monthly Variable Charge, per customer, per retailer	\$/cust.	1.02
Distributor-consolidated billing monthly charge, per customer, per retailer	\$/cust.	0.61
Retailer-consolidated billing monthly credit, per customer, per retailer	\$/cust.	(0.61)
Service Transaction Requests (STR)		
Request fee, per request, applied to the requesting party	\$	0.51
Processing fee, per request, applied to the requesting party	\$	1.02
Request for customer information as outlined in Section 10.6.3 and Chapter 11 of the Retail		
Settlement Code directly to retailers and customers, if not delivered electronically through the		
Electronic Business Transaction (EBT) system, applied to the requesting party		
Up to twice a year	\$	no charge
More than twice a year, per request (plus incremental delivery costs)	\$	4.08
Notice of switch letter charge, per letter	\$	2.04

# LOSS FACTORS

If the distributor is not capable of prorating changed loss factors jointly with distribution rates, the revised loss factors will be implemented upon the first subsequent billing for each billing cycle

apon the mat subsequent binning for each binning cycle.	
Total Loss Factor – Secondary Metered Customer < 5,000 kW	1.0379
Total Loss Factor – Secondary Metered Customer > 5,000 kW	1.016
Total Loss Factor – Primary Metered Customer < 5,000 kW	1.0276
Total Loss Factor – Primary Metered Customer > 5,000 kW	1.006

EB-2019-0018 Alectra Utilities 2020 EDR Application Draft Rate Order Delivered: February 10, 2020

# Attachment 2

# **Horizon Utilities RZ Bill Impacts**

# Incentive Rate-setting Mechanism Rate Generator for 2020 Filers

The bill comparisons below must be provided for typical customers and consumption levels. Bill impacts must be provided for residential customers consuming 750 kWh per month and general service customers consuming 2,000 kWh per month and having a monthly demand of less than 50 kW. Include bill comparisons for Non-RPP (retailer) as well. To assess the combined effects of the shift to fixed rates and other bill impacts associated with changes in the cost of distribution service, applicants are to include a total bill impact for a residential customers to residential customers, 10% of a distributor's residential customers consume at or less than this level of consumption on a monthly basis). Refer to section 3.2.3 of the Chapter 3 Filing Requirements For Electricity Distributions.

For certain classes where one or more customers have unique consumption and demand patterns and which may be significantly impacted by the proposed rate changes, the distributor must show a typical comparison, and provide an explanation.

#### Note:

1. For those classes that are not eligible for the RPP price, the weighted average price including Class B GA through end of May 2018 of \$0.1117/kWh (IESO's Monthly Market Report for May 2018, page 22) has been used to represent the cost of power. For those classes on a retailer contract, applicants should enter the contract price (plus GA) for a more accurate estimate. Changes to the cost of power can be made directly on the bill impact table for the specific class.

2. Please enter the applicable billing determinant (e.g. number of connections or devices) to be applied to the monthly service charge for unmetered rate classes in column N. If the monthly service charge is applied on a per customer basis, enter the number "1". Distributors should provide the number of connections or devices reflective of a typical customer in each class.

Note that cells with the highlighted color shown to the left indicate quantities that are loss adjusted.

EB-2019-0018 Alectra Utilities 2020 EDR Application Draft Rate Order Delivered: February 10, 2020

# **Attachment 4**

# Draft Accounting Order Guelph Rate Zone

### ACCOUNTING ORDER

### ACCOUNT 1508 OTHER REGULATORY ASSETS, SUB-ACCOUNT IMPACT OF POST-MERGER CAPITALIZATION POLICY CHANGES - GUELPH RATE ZONE

The purpose of the deferral account will be to record the financial differences arising as a result of the change to the capitalization policy for the Guelph Rate Zone ("GRZ"), effective January 1, 2020, as follows:

- Alectra Utilities will record in this deferral account the cumulative difference between the property, plant and equipment ("PP&E") under the pre-merger capitalization policy and the PP&E under the post-merger capitalization policy. A journal entry to record the variance will be booked at the end of the fiscal year of each year, until the next cost of service rebasing year;
- 2. The amount of the cumulative variance recorded in this account will be recovered from, or refunded to, ratepayers in the next cost of service rebasing year;
- 3. Upon disposition of the balance in the deferral account, a rate of return component will be applied to the balance based on the disposition period to determine the amount to be used to calculate rate riders. The weighted average cost of capital to be used and rate of return component will be determined at the time the accounts are disposed; and
- 4. Interest carrying charges will not be applied to the deferral account.

A sample journal entry is provided below:

# To record the financial differences arising from the change to the capitalization policy in GRZ:

- Dr. 4080 Distribution Services Revenue GRZ
  - Cr. 1508 Sub-Account Impact of Post-Merger Capitalization Policy Changes GRZ
