Subject: Proposed Pipeline

To whom this may concern,

We seem to be living in a world of cowards, these cowards are politicians who see only through the eyes of reelection and thus have no vision for the future. We are tied to the hip of the American imperialist agenda and thus have no vision for Canada itself. To continue down the road of resource extraction at all cost with no regard to the future is cowardice. Canada could be the leader in that change if only politicians right here in our own city and province would stand up and show that courage. I guess Greta Thunberg and Autumn Pelletier will have to be the ones who stand up for Mother Earth because politicians certainly don't possess their courage.

Stop the pipeline building and extraction of resources at all cost.
