Hello,

I appreciate the opportunity to comment on this application.

If you listen to the world's leading scientists, we are in a "climate emergency" and need to be acting accordingly. i understand the situation for what it is, and believe that we should be urgently doing something to address the problem.

If you understand what earth's smartest people are saying...

The very least we should be doing is to stop ALL new oil & gas projects and transition immediately over to Renewable energy!

This "Dawn-Parkway" pipeline will practically be going through my backyard, so I believe that I have a right to be part of the approval process - I say unequivocally, NO!

Although I believe the statements above should be sufficient I'll also add - Ontario should not be supporting natural gas "fracking" as it is extremely damaging to the environment.

You are in the position to 'stop the madness' - Please do so.

Thanks for you cooperation,

Mark Freeman
