Subject: The climate is directly affected by fracking

Hello,

I understand there is a question of whether the climate should be considered as it relates to fracking. That seems to me like wondering if smoking has any connection to lung cancer...

We no longer have the luxury of pondering this question, and wondering if we need to consider the climate when making decisions about pipelines and fracking.

Please let's not be naive about this. 50 years from now, we will be laughed at, just as we laugh at ads from the 1950s which extol the benefits of smoking.

Thank you for making taking letters like mine seriously, and for reconsidering your position on this pipeline. Our future, our children's future, and our grandchildren's future depends on it.

Sincerely,
Robyn
