My personal information is available upon request from the city. I have omitted it here because I do not wish for it to be visible on the OEB's public website.

I strongly urge the City of Hamilton to consider the ecological footprint of the Enbridge pipeline. I am more than a little concerned about the ongoing climate emergency. It is vitally important to me, and to this community, to do everything we can to achieve a net-zero carbon emissions target as soon as it is possible to do so. Sadly, we cannot afford this pipeline or any of its associated projects.
