**Subject:** concern about proposed dawn parkway expansion.

I have just been made aware of Enbridge's proposed dawn parkway expansion. I've heard that the Enbridge has asked when applying to the OEB, that climate change should not be considered in the application. CLIMATE CHANGE MUST BE CONSIDERED IN THE PROCESS OF PIPELINE APPROVAL. Also, environmental effects of the fracking in pennsylvania must also be considered. This is very, very concerning to me as an Ontario resident. The longer we deny rational concerns about fracking, expansion of pipelines and all the supporting infrastructures, they less time have to do something about climate change.
