Subject: Stop pipeline expansion everywhere! Focus on climate emergency!

Dear Honourable Mr. Yurek and Board,

Climate change is upon us. Glaciers are melting, oceans are rising, the planet's temperature is increasing. Climate emergencies have been declared in all sectors, world-wide. We can no longer stick our heads in the sand. It is vital that fossil fuels stay in the ground, and that governments focus on renewable industries to take the place of oil and gas sector industries. It is incumbent on all governments to stop the building and expansion of pipelines. I urge you to focus on renewable energy to replace fossil fuels, and stop building and expanding any fossil fuel infrastructure such as pipelines. Saving the planet starts now and our governments at all levels must take the lead and work together. The people demand it!

Renate Manthei
