Tomorrow, when the City of Hamilton reviews the above referenced file, I urge that climate change is taken into consideration in the application for Enbridge's proposed Dawn Parkway Expansion.

It is absurd that a company can specifically request that climate change not be considered in regards to both the greenhouse effects of fracking, as well as the building of a pipeline to carry the dirty energy. In a sense, it is admitting that expansion is problematic in the current climate crisis.

The Energy Board cannot entertain such a request.
