BY COURIER (2 COPIES) AND RESS

Ms. Christine Long

Board Secretary

Ontario Energy Board

2300 Yonge Street, Suite 2700, P.O. Box 2319

Toronto, Ontario M4P 1E4

Dear Ms. Long:

Re: EB-2019-0188 – Enbridge Gas Inc. – North Bay (Northshore and Peninsula Roads) Community Expansion Project

We are writing on behalf of Environmental Defence to request intervenor status and costs eligibility in the above proceeding as a leading environmental organization that represents both the public interest in environmental protection and the interests of consumers who benefit from protections against financial risks associated with climate change.

Nature and Scope of Intended Participation and Interest in Proceeding

Environmental Defence wishes to file interrogatories, participate in the hearing, review and test the evidence, make submissions, and seek a cost award. Environmental Defence's interest in this proceeding is in promoting both the public interest in environmental protection and the interests of consumers who benefit from protections against financial risks associated with climate change. Environmental Defence wishes to address important issues relating to this mandate. For example, Environmental Defence wishes to address:

- Whether customers are adequately protected from financial risks, revenue shortfalls, and cost overruns (e.g. the risk that fewer customers convert to gas than forecast);
- Whether the customer attachment forecast is reasonable;
- Whether the application complies with the *Access to Natural Gas Act, 2018* and related government policy;
- Whether the application complies with Board directions and guidelines, including EB-2016-0004; and
- Whether the legal tests under sections 36 and 90(1) of the *Ontario Energy Board Act* have been met.

Oral Hearing

Environmental Defence notes that the government funding for this project is more than four times the funding for the Chippewas of the Thames Community Expansion Project and the Saugeen First Nation Community Expansion Project. The additional cost warrants additional scrutiny. Environmental Defence requests an opportunity to ask interrogatories and to receive full and adequate interrogatory responses. If full and adequate interrogatory responses are provided, Environmental Defence does not believe an oral hearing is required.

Environmental Defence

A. Mandate and Objectives of Environmental Defence

Environmental Defence has been working since 1984 to protect Canadians' environment and human health. Environmental Defence's mandate and objective is to challenge, and inspire change in government, business and people to ensure a greener, healthier and prosperous life for all. Its vision is to create a world Canadians are proud to pass on to their children.

B. Membership and Constituency

Environmental Defence is supported by many thousands of donors across the province and country. It sees its constituency as Canadians who are concerned about the environment and the legacy that we will pass on to our children.

C. Types of Programs and Activities that Environmental Defence Carries Out

Environmental Defence has been highly successful in its public interest advocacy on energy issues. Environmental Defence's environmental work, on issues ranging from toxic chemicals to clean beaches, has led to concrete improvements in the lives of Canadians. For example, the dangerous chemical Bisphenol A ("BPA") is now banned in baby bottles in Canada due to concerns first raised by Environmental Defence in 2007. For many years, Environmental Defence has participated in the federal government's Chemicals Management Plan.

Environmental Defence is also the coordinator of Blue Flag Canada, which certifies beaches so that Ontario families can enjoy this public resource. It also co-founded Blue Green Canada with the United Steelworkers, which promotes green energy initiatives that have positive employment and economic impacts.

Environmental Defence also publishes reports and guides in the area of energy conservation, efficiency, and policy. For example, it has created an interactive online tool to help energy consumers reduce their bills through energy efficiency initiatives. Some further publications include:

- *Building an Ontario Green Jobs Strategy*
- *Ontario's Electricity System, a Backgrounder*

- *Canada's Methane Gas Problem: Why strong regulations can reduce pollution, protect health, and save money*
- *Powering up efficiency to get the conservation framework right*
- *The \$2 Billion Question - How Can Ontario Reinvest Cap-and-Trade Proceeds to Meet its Climate Challenge and Grow the Economy?*
- *What to Look for in the Canadian Energy Strategy*
- *Backgrounder - Coal and Renewable Energy in Ontario*
- *Building Ontario's Green Economy: A Road Map*
- *Ontario Feed-In Tariff: 2011 Review*
