Subject: Natural gas expansion is no climate solution for Ontario

To Ontario Energy Board,

At this day and age, we can no longer pretend that things are not rapidly changing all around us. We may still be able to avert the worst effects of climate change if we act decisively and with open eyes, turning our economies away from fossil fuels and investing ONLY in green projects. Anything else spells a blatant disregard for the future of our own children, and probably dooming their children to an unlivable planet. Please keep that in mind when making decisions regarding the ABSURD idea that we need to increase fossil fuel pipelines capacity. It is seriously irresponsible. The money needs to be invested in sustainable energy projects instead. And by no means, should be my money as a taxpayer, be used in support of fossil fuel project of any kind. I strongly object.
Thank you for reading my petition, and I urge you to please think deeply about the impact you will be making with your decisions.

Lenka Lichtenberg
