Subject: My comments on Enbridge gas pipeline proposal EB-2019-0159

To Ontario Energy Board,

Hello. Please do now proceed with this pipeline. We are currently seeing the very beginning of the negative impacts of global warming and climate change. It can accelerate very rapidly hurting all Ontarians and Canadians. There are still huge opportunities in designing and generating wind and solar plus geothermal power. And we must increase our conservation efforts. Fracked gas is terrible for the environment!

Thanks.

Mary Aitken
