Subject: Comments on Enbridge gas pipeline proposal EB-2019-0159

To Ontario Energy Board,

I am writing in regard to the proposed Dawn-Parkway pipeline. I am against this project. Undertaking this project is not in keeping with Ontario's environment plan. It will absolutely not lead to a decrease in natural gas emissions, which is what is needed now. As well, there will be impacts on species at risk and various ecosystems as a result of the construction and the inevitable leaks. These things must be taken into consideration. I urge Ontario to hold a fully transparent oral hearing, open to the public. The Enbridge Dawn-Parkway pipeline proposal affects all people living in Ontario. Thanks for your consideration.

John Mark Robertson
