I live in a 2 bedroom condo and my household is heated via baseboards , my average bill in the winter for hydro is over \$350/mo which is alot for 1 person to pay who works monday through friday , keeps the temp at 15 degrees and uses a blanket to stay worm on the couch . I make \$55 000 a year and live in poverty with all the associated costs of surviving in Canada with no hope of saving enough money to buy a home and this increase will put me even further behind which will insure that i will probably never get to retire, the hydro company charges a delivery fee as is which should be more than enough to deliver the product without increasing rates and if they want to increase rates they should remove the delivery fee
