It would be helpful if the applicant was required to file for distribution and consumption rates at the same time and for the same period. This would allow customers and authorities to review the full financial forecasts of the company that would drive the requested rate increases, and would simplify and expedite the review process. Finally, it would be helpful to require the applicant to disclose the current average monthly invoice amount, the requested increase in dollar terms and then the increase in both dollar terms and percentage terms. This would allow customers to quickly assess the proposed rate increase against the current low inflation rate and see if the request is reasonable or not.

Thank you.
