**Subject:** My comments on Enbridge gas pipeline proposal EB-2019-0159

To Ontario Energy Board,

Increasing natural gas pipeline capacity does not square with Ontario's environment plan which relies on a significant decrease in natural gas emissions to meet its carbon pollution reductions. Fossil fuel project reviews, such as of Enbridge's Dawn-Parkway gas pipeline, must consider the climate impacts of upstream extraction and downstream consumption. Pipeline reviews need to assess the economic risks of projects in the face of global commitments to reduce fossil fuel use, especially when Ontario ratepayers subsidize pipeline costs. OEB reviews of energy projects need to consider alternatives like investments in energy efficiency, conservation and renewable energy. Pipeline assessments need to seriously consider impacts to species at risk and ecosystems from construction and leaks. Those ecological studies need to happen before a review is conducted, not after. Hold a fully transparent oral hearing, open to the public. The Enbridge Dawn-Parkway pipeline proposal affects all people living in Ontario.

I find these intended moves to be deeply disturbing and, as a citizen of Canada, who is supposed to have a voice in the decisions being made, I wholly disagree with increasing our pollution instead of spending our money to generate sustainable and greener alternatives. Each of us makes a difference and this is my money too. This is the health and well-being of myself and my future generations too. I would be willing to pay more for greener solutions.

Alicia Braid

Yours truly,

Alicia Braid [REDACTED]
