To Ontario Energy Board,

Do you believe our scientists when they warn us about the corona virus, and how to prevent its spread from worsening ?

If so, then WHY DONT YOU BELIEVE THE SCIENTISTS' RECOMMENDATIONS REGARDING GLOBAL WARMING CRISIS ?

This flies in the face of common sense, as did Fords dismantling of green energy installations. We don't need more pipelines, we need investment in electrical energy storage to increase the productivity of our current green energy, and to build more to cope with the increased demand as the nuclear facilities are brought offline.

How is this difficult to comprehend ?

Rick Schroeder
