From nov billing rates

Electricity On-Peak 0.1340

Electricity Mid-Peak 0.0940

Electricity Off-Peak 0.0650

To Dec bill rates

Electricity On-Peak 0.2080

Electricity Mid-Peak 0.1440

Electricity Off-Peak 0.1010

that works out to an increase

Electricity On-Peak 0.074 \$

Electricity Mid-Peak 0.050 \$

Electricity Off-Peak 0.035 \$

i haven't seen an increase an my household income grocery costs, gas, insurance and every product we purchase has increased costs added to the people of Ontario's bill list.

it just isn't right to keep increasing costs when people in Ontario are not increasing their income.

what should happen is prices need to come down so people can afford to live.

my family needs to eat and needs to have electricity.
