Dear Ms. Cooledge:

**Re: Correction to Tariff of Rates and Charges
Newmarket-Tay Power Distribution Ltd. (Newmarket-Tay Power)
Updated Cost Allocation and Application for 2020 Rates
Ontario Energy Board File Number: EB-2019-0055**

The Ontario Energy Board (OEB) issued a Decision and Rate Order on the incentive rate-setting mechanism (IRM) application filed by Newmarket-Tay Power in the above-noted proceeding on April 21, 2020.

Following the issuance of the Decision and Rate Order, the OEB learned of a calculation error therein. As set out in the portion of the Tariff of Rates and Charges related to the Newmarket-Tay Rate Zone, the General Service 50 to 4,999 kW rate class has two variable rates: the Thermal Demand Meter rate and Interval Meter rate. The same figure of \$4.9190 / kW was applied to both variable rates. While this is correct for the Thermal Demand Meter rate, a separate calculation is required for the Interval Meter rate. Correctly calculated, the Interval Meter rate should be \$5.0565 / kW, which is the 2019-approved figure of \$4.9867 / kW increased by the Annual IR adjustment of 1.4%, as approved in the Decision and Rate Order.

Pursuant to Rule 41.02 of the OEB's *Rules of Practice and Procedure*, the OEB may at any time, without notice or a hearing of any kind, correct a typographical error, error of calculation or similar error made in its orders or decisions. The OEB considers this to be an error of calculation.

The OEB has revised the Tariff of Rates and Charges to include the above-noted variable rate correction. The Decision and Rate Order is not otherwise changed in any way.

The Tariff of Rates and Charges now reads:

Distribution Volumetric Rate - Interval Meter	\$/kW	5.0565
---	-------	--------

The Tariff of Rates and Charges, as originally issued, stated:

Distribution Volumetric Rate - Interval Meter	\$/kW	4.9190
---	-------	--------

The OEB has issued the corrected Tariff of Rates and Charges with this letter.

Yours truly,
