VIA EMAIL and RESS

May 19, 2020

Ms. Christine Long
Ontario Energy Board
2300 Yonge Street, 27th Floor
Toronto, ON M4P 1E4

Dear Ms. Long:

**Re: Enbridge Gas Inc. (Enbridge Gas)
Ontario Energy Board (Board) File No.: EB-2019-0294
Low Carbon Energy Project
Affidavit of Service – REDACTED**

On April 21, 2020, the Board issued the Notice of Application and Letter of Direction for the above noted proceeding.

As directed by the Board, enclosed please find the Affidavit of Service of Enbridge Gas.

In accordance with the Board's revised Practice Direction on Confidential Filings effective October 28, 2016, all personal information has been redacted from the Affidavit of Service.

The confidential Exhibits are being sent separately via email to the Board.

Please contact the undersigned if you have any questions.

Sincerely,

Stephanie Allman
Regulatory Coordinator

ONTARIO ENERGY BOARD

IN THE MATTER OF the *Ontario Energy Board Act, 1998*, S.O. 1998, c. 15 (Sched. B), as amended (the “OEB Act”);

AND IN THE MATTER OF an application by Enbridge Gas Inc. under section 90 of the OEB Act for an order or orders granting leave to construct natural gas distribution pipelines and ancillary facilities to enable its Low Carbon Energy Project in the City of Markham;

AND IN THE MATTER OF an application under section 36 of the OEB Act for an order or orders approving a rate rider to be applied to customers impacted by the Low Carbon Energy Project.

AFFIDAVIT OF SERVICE

I, Stephanie Allman, of the Town of Keswick, make oath and say as follows:

1. I am in the employ of Enbridge Gas Inc. (“Enbridge”) and as such have knowledge of the matters hereinafter deposed to.
2. From April 4, 2019 to September 19, 2019, a search of title forthwith sufficient to determine the owners and encumbrances with land, or registered interests in land directly affected by the proposed pipeline and related facilities was conducted.
3. Pursuant to the April 21, 2020 Letter of Direction from the Ontario Energy Board (the “OEB” and / or the “Board”), I caused to be served by email a copy of the Notice of Application (Exhibit “A”), Enbridge’s Application (Exhibit “B”), and the following pieces of evidence
 - B-1-1 - Purpose, Need, Proposed Facilities & Timing
 - Attachments 1 - 6
 - E-1-1 - Land Requirements & Agreements
 - F-1-1 – Indigenous Consultation

Due to the size of the exhibits noted above, they have not been attached with this Affidavit. A link was provided within the cover letter to reference evidence that was filed in this proceeding.

4. In accordance with the OEB's Letter of Direction, I cause to be served by email a copy of the Notice of Application and Enbridge's application and evidence upon all property owners and encumbrancers with lands or interest in lands identified in the search of title. Attached hereto is proof in the form of emails (Exhibit "C") that the above noted was served on those parties as requested by the OEB in the Letter of Direction.
5. In accordance with the OEB's Letter of Direction, I cause to be served by email a copy of the Notice of Application and Enbridge's application and evidence upon the clerks of all municipal and township offices where the proposed natural gas pipeline and associated facilities are to be located. Attached hereto is proof in the form of an email (Exhibit "D") that the above noted was served on those parties as requested by the OEB in the Letter of Direction.
6. In accordance with the OEB's Letter of Direction, I cause to be served by email a copy of the Notice of Application and Enbridge's Application upon all Indigenous communities that have been consulted or with lands or interest in the lands directly affected by the proposed pipeline and related facilities. Attached hereto is proof in the form of emails (Exhibit "E") that the above noted was served on those parties as requested by the OEB in the Letter of Direction.

Please note: Due to the size of the exhibits outlined in Paragraph 3 (above), it was necessary to send the email via Enbridge File Transfer (EFT). This method is used for sending large attachments that regular email cannot handle. This approach can be confusing to external users because a username and password are required. It was confirmed that all First Nation Communities (Communities) had difficulty accessing the documents sent via EFT. Please see the timetable of events outlined below:

- April 29, 2020 – The first email sent via EFT to Communities (included Notices (EN and FR), Exhibits A-2-1, B-1-1 (plus attachments), E-1-1, and F-1-1) and link to Enbridge’s website to view all evidence.
- May 4, 2020 - Followed up with Enbridge’s Indigenous Affairs Advisors (Advisors) for them to reach out to the Communities on my behalf to ensure the Notice and corresponding attachments were received.
- Due to the fact that our Advisors were reaching out to the Communities via regular email, the evidence (B-1-1, plus attachments, E-1-1 and F-1-1) were not included within their email due to size. However, the Notices (EN and FR) and Enbridge’s Application (A-2-1), plus a link to the Enbridge website were included in the email to the Communities. Enbridge Gas was able to confirm receipt of the email with all parties except Mississaugas of the Credit First Nation (MCFN). Our Advisor spoke with MCFN on the phone to confirm they were in receipt of the Notice of Application sent on April 29, 2020. Because of the COVID-19 situation, MCFN have not been in the office to check emails but did confirm that they are aware of the project and they don’t have any concerns knowing that it’s designed to lower the carbon footprint.
- Between May 5, 2020 – May 14, 2020 the Advisors followed up with all Communities. See the table below:

<u>FN Community</u>	<u>Confirmation Received</u>
Alderville First Nation	May 13, 2020
Curve Lake FN	May 12, 2020
Hiawatha FN	May 7, 2020
Huron Wendate FN	May 5, 2020
Mississaugas of Scugog Island FN	May 13, 2020
Mississaugas of the Credit FN	May 14, 2020

7. In accordance with the OEB's Letter of Direction, I cause to be served by email a copy of the Notice of Application and Enbridge's Application upon the Métis Nations of Ontario, Lands, Resources and Consultation Office. Attached hereto is proof is the form of email (Exhibit "F") that the above noted was served on those parties as requested by the OEB in the Letter of Direction.
8. In accordance with the OEB's Letter of Direction, I cause to be served by email a copy of the Notice of Application and Enbridge's application and evidence upon all affected utilities and railway companies. In accordance with Enbridge Gas' Land Department, there are no railway companies affected by this project, and the only utility affected by this project is Hydro One Networks Inc. ("HONI"). They have been served as a landowner. Please see Exhibit C.
9. In accordance with the OEB's Letter of Direction, I cause to be served by email a copy of the Notice of Application and Enbridge's Application upon the members of the Ontario Pipeline Coordinating Committee. Attached hereto is proof is the form of an email (Exhibit "G") that the above noted was served on those parties as requested by the OEB in the Letter of Direction.
10. In accordance with the Letter of Direction, I caused a copy of the Notice, Application and evidence to be placed in a prominent place on Enbridge's website. Attached as Exhibit "H" is proof of the information posted to Enbridge Gas Inc.'s website.

SWORN before me in the City of)
Toronto, this 19th day of)
May, 2020.)

)

(Original Signed)

Stephanie Allman

ONTARIO ENERGY BOARD

IN THE MATTER OF the *Ontario Energy Board Act, 1998*, S.O. 1998, c. 15 (Sched. B), as amended (the “OEB Act”);

AND IN THE MATTER OF an application by Enbridge Gas Inc. under section 90 of the OEB Act for an order or orders granting leave to construct natural gas distribution pipelines and ancillary facilities to enable its Low Carbon Energy Project in the City of Markham;

AND IN THE MATTER OF an application under section 36 of the OEB Act for an order or orders approving a rate rider to be applied to customers impacted by the Low Carbon Energy Project.

**LEAVE TO CONSTRUCT
APPLICATION: LOW CARBON ENERGY PROJECT**

1. The Applicant, Enbridge Gas Inc. (Enbridge Gas), is an Ontario corporation with its head office in the City of Toronto. It carries on the business of selling, distributing, transmitting and storing natural gas within the province of Ontario.
2. Enbridge Gas has identified an opportunity which will allow the gas distribution system to contribute towards reducing the environmental impacts of greenhouse gas emissions (GHG) in Ontario by injecting a controlled quantity of hydrogen into the natural gas stream. This project is called the Low Carbon Energy Project (LCEP or the Project).
3. The LCEP is a pilot project that will allow the Company to green a portion of the natural gas grid in Ontario. The experience gained through the implementation of the LCEP will position Enbridge Gas to then expand hydrogen injection into other parts of its gas distribution system, further enhancing reductions to GHG emissions across the province.

4. The LCEP will require isolation of a small portion of Enbridge Gas's distribution system, referred to as the blended gas area (BGA). This will allow Enbridge Gas to monitor the operational impact of hydrogen blending.
5. The BGA is located in Markham, Ontario. It extends south from 19th Avenue in the north to Major McKenzie Drive East in the south. It is bounded from the west by Highway 404 and extends approximately 1.5km to the east towards Victoria Square Boulevard. A map of the BGA is provided in Attachment 5 to Exhibit B, Tab 1, Schedule 1. Once the LCEP is operational, Enbridge Gas will be able to provide blended gas distribution service to approximately 3,600 customers in the BGA.
6. Enbridge Gas believes the LCEP is a prudent first step towards introducing hydrogen injection into its distribution network. The Project will be the first of its kind in North America. Successful implementation of this pilot project will support Enbridge Gas in pursuing additional and larger scale hydrogen blending activities in other parts of its distribution system.
7. This Application is made to the Ontario Energy Board (OEB, or the Board) pursuant to section 90 of the OEB Act for an Order granting leave to construct the facilities required to enable the LCEP (the LCEP Facilities). Details on Project costs are shown in Exhibit D, Tab 1, Schedule 1.
8. The LCEP Facilities are located in close proximity to Enbridge Gas's Technology and Operations Centre (TOC) on Honda Boulevard in Markham, Ontario. The LCEP Facilities include one section of nominal pipe size (NPS) 6" extra high pressure (XHP) steel (ST) Pipeline, one section of NPS 6" high pressure (HP) ST Pipeline and one section of NPS 8" intermediate pressure (IP) polyethylene (PE) Pipeline. The lengths of these pipeline sections are approximately 380 m, 350 m and 25 m respectively. Other required facilities for the Project include a hydrogen blending station, a hydrogen station, a district station and two pipe disconnections.

These facilities are required to carry natural gas from the existing Enbridge Gas XHP pipeline on Woodbine Avenue to the TOC, and then to blend hydrogen produced by a Power to Gas (PtG) facility at the TOC, and then to distribute the blended gas to the BGA.

9. Exhibit B, Tab 1, Schedule 1, Attachment 3 and Attachment 4 provide maps showing the general location of the LCEP Facilities and the municipalities, and highways through, under, over, upon or across which the pipelines will pass.
10. The route and location for the proposed pipelines outside of the TOC that are part of the LCEP Facilities were selected by an independent environmental consultant (Dillon Consulting Ltd.), through the process outlined in the Board's *Environmental Guidelines for the Location, Construction, and Operation of Hydrocarbon Pipelines in Ontario (Sixth Edition, 2011)* (the Guidelines). Details on the route selection and the Environmental and Socio-Economic Impact Assessment (ER) of the proposed facilities are included at Exhibit C, Tab 1, Schedule 1 of the pre-filed evidence. Information on indigenous consultations and Duty to Consult activities can be found at Exhibit F, Tab 1, Schedule 1 of the pre-filed evidence.
11. Enbridge Gas also applies to the Board pursuant to Section 97 of the Act for an Order approving the Form of Temporary Land Use Agreement which can be found in the prefiled evidence at Exhibit E, Tab 1, Schedule 1, Attachment 1.
12. Additionally, Enbridge Gas applies for an Order under section 36 of the OEB Act approving the use of a rate rider to compensate customers in the BGA for the additional extra costs associated with the slight increase in volumetric requirements for blended gas as compared to conventional natural gas.
13. With leave of the Board, Enbridge Gas expects to commence construction of the LCEP in the second quarter of 2021. This timing is required in order to gain experience with the blending of hydrogen into the natural gas distribution system

in advance of pending carbon abatement regulations (including the Clean Fuel Standard). In order to meet Project timelines, Enbridge Gas respectfully requests the approval of this Application as soon as possible or not later than November 2020. Exhibit D, Tab 1, Schedule 1 provides the proposed construction schedule.

14. The parties affected by this Application are the owners of lands, government agencies and municipalities over which the pipeline will be constructed, and Enbridge Gas's distribution customers with respect to quality of service and security of supply. The persons affected by this Application include the customers resident or located in the BGA. It is impractical to set out in this Application the names and addresses of such persons because they are too numerous.
15. A list of permitting authorities is provided at Exhibit E, Tab 1, Schedule 1.
16. Enbridge Gas requests that this Application proceed by way of written hearing in English.
17. Enbridge Gas therefore requests, on the basis set out above, that the Board make the following orders:
 - (i) an Order pursuant to section 90 of the OEB Act granting leave to construct the LCEP Facilities;
 - (ii) an Order pursuant to section 97 of the OEB Act approving the proposed form of easement agreements;
 - (iii) an Order pursuant to section 36 of the OEB Act approving the proposed rate rider for customers in the BGA; and
 - (iv) such additional Orders as Enbridge Gas may request and the Board approves.

Enbridge Gas requests that copies of all documents filed with the Board in connection with this proceeding be served on it and on its counsel, as follows:

- (a) The Applicant: Regulatory Affairs
Enbridge Gas Inc.
Address for personal service: 500 Consumers Road
Toronto, ON M2J 1P8

E-Mail: dstevens@airdberlis.com

DATED March 31, 2020 at Toronto, Ontario.

ENBRIDGE GAS INC.

[original signed by]

Joel Denomy
Technical Manager, Regulatory Applications

Enbridge Gas Inc. has applied for approval to construct natural gas pipelines in the City of Markham, Regional Municipality of York, for the purposes of a pilot project involving the distribution of blended natural gas composed of methane with up to 2% hydrogen by volume to approximately 3600 existing customers.

Learn more. Have your say.

If the application is approved, the project would involve the construction of approximately 755 metres of natural gas pipelines and ancillary facilities in Markham, Ontario. The proposed pipelines are needed to isolate a small portion of Enbridge Gas Inc.'s existing distribution system. When combusted, the blended natural gas will produce lower greenhouse gas emissions relative to traditional natural gas.

The energy density of the blended natural gas is lower than traditional natural gas, meaning that the volumetric consumption of customers in the isolated area will increase. Enbridge Gas Inc. is asking the Ontario Energy Board for approval to refund to affected customers the extra cost associated with consuming the blended gas. Enbridge Gas estimates an annual credit to affected customers of approximately \$10 per year.

A map of the proposed project is to the right.

THE ONTARIO ENERGY BOARD WILL HOLD A PUBLIC HEARING

The Ontario Energy Board (OEB) will hold a public hearing to consider Enbridge Gas' application. During the hearing, which could be an oral or written hearing, we will question Enbridge Gas on the case. We will also hear questions and arguments from individual consumers, municipalities and others whose interests would be affected. At the end of this hearing, the OEB will decide whether to approve the application.

As part of its review of this application, the OEB will assess Enbridge Gas' compliance with the OEB's Environmental Guidelines for the Location, Construction and Operation of Hydrocarbon Pipelines and Facilities in Ontario.

The OEB will also assess whether the duty to consult with Indigenous Communities potentially affected by the proposed pipeline has been discharged with respect to the application.

The OEB is an independent and impartial public agency. We make decisions that serve the public interest. Our goal is to promote a financially viable and efficient energy sector that provides you with reliable energy services at a reasonable cost.

BE INFORMED AND HAVE YOUR SAY

You have the right to information regarding this application and to be involved in the process.

- You can review the application filed by Enbridge Gas' on the OEB's website now
- You can file a letter with your comments, which will be considered during the hearing
- You can become an intervenor. As an intervenor you can ask questions about Enbridge Gas' application and make arguments on whether the OEB should approve Enbridge Gas' request. Apply by **May 11, 2020** or the hearing will go ahead without you and you will not receive any further notice of the proceeding
- At the end of the process, you can review the OEB's decision and its reasons on our website

LEARN MORE

Our file number for this case is **EB-2019-0294**. To learn more about this hearing, find instructions on how to file a letter with your comments or become an intervenor, or to access any document related to this case, please select the file number **EB-2019-0294** from the list on the OEB website: www.oeb.ca/noticeltc. You can also phone our Consumer Relations Centre at 1-877-632-2727 with any questions.

ORAL VS. WRITTEN HEARINGS

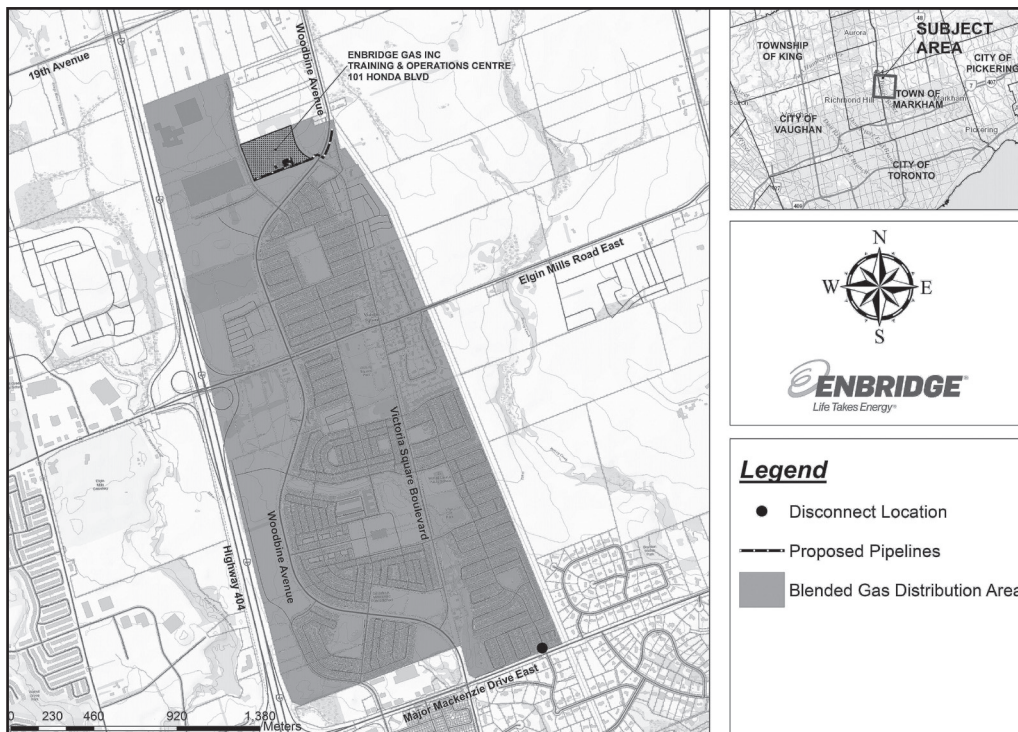

There are two types of OEB hearings – oral and written. Enbridge Gas has applied for a written hearing. The OEB is considering this request. If you think an oral hearing is needed, you can write to the OEB to explain why by **May 11, 2020**.

PRIVACY

If you write a letter of comment, your name and the content of your letter will be put on the public record and the OEB website. However, your personal telephone number, home address and email address will be removed. If you are a business, all your information will remain public. If you apply to become an intervenor, all information will be public.

This hearing will be held under section 90(1), 97 and 36 of the Ontario Energy Board Act, 1998, S.O. 1998, c.15, Schedule B.

Ontario Energy Board
P.O. Box 2319, 27th Floor

Fax: 416-440-7656

Enbridge Gas Inc. a présenté une demande en vue d’obtenir l’autorisation de construire des gazoducs dans la ville de Markham, municipalité régionale de York, dans le cadre d’un projet pilote de distribution d’un mélange de gaz naturel composé de méthane contenant jusqu’à 2 % d’hydrogène en volume, à environ 3600 clients de la compagnie.

Renseignez-vous. Donnez votre avis.

Si la demande est approuvée, le projet consistera à construire des gazoducs et des installations auxiliaires de 755 mètres environ à Markham, en Ontario. Les gazoducs proposés sont nécessaires à l’isolation d’une petite partie du système de distribution actuel de la compagnie Enbridge Gas Inc. Lors de la combustion, le mélange de gaz naturel émettra moins de gaz à effet de serre que le gaz naturel classique.

La densité énergétique du mélange de gaz naturel est moins élevée que celle du gaz naturel classique, ce qui signifie que le volume de consommation des clients habitant dans la zone isolée augmentera. Enbridge Gas Inc. demande à la Commission de l’énergie de l’Ontario d’autoriser le remboursement des coûts supplémentaires associés à la consommation du mélange de gaz, aux clients concernés. Enbridge Gas prévoit d’accorder un crédit annuel d’environ 10 \$ à chaque client concerné.

Une carte du projet proposé est fournie ci-dessous.

LA COMMISSION DE L'ÉNERGIE DE L'ONTARIO TIENDRA UNE AUDIENCE PUBLIQUE

La Commission de l’énergie de l’Ontario (CEO) tiendra une audience publique afin d’étudier la demande d’Enbridge Gas. Durant cette audience, qui peut être une audience orale ou écrite, nous interrogerons Enbridge Gas à propos du projet. Nous écouterons également les questions et les arguments des consommateurs, des municipalités et de toute autre entité dont les intérêts sont en jeu. À l’issue de cette audience, la CEO prendra sa décision quant à l’approbation de la demande.

Dans le cadre de cette demande, la CEO évaluera le respect de ses directives en matière d’environnement par Enbridge Gas, en ce qui concerne l’emplacement, la construction et l’exploitation des pipelines et des installations d’hydrocarbures en Ontario.

La CEO s’assurera également que l’obligation de tenir des consultations auprès des communautés autochtones potentiellement concernées par le projet de gazoduc a bien été respectée.

La CEO est une agence publique indépendante et impartiale. Les décisions que nous prenons visent à servir au mieux l’intérêt public. Notre objectif est d’encourager le développement d’un secteur de l’énergie efficace et financièrement viable, afin d’offrir des services énergétiques fiables à un prix raisonnable.

RENSEIGNEZ-VOUS ET DONNEZ VOTRE AVIS

Vous avez le droit d’être informé au sujet de cette demande et de participer au processus.

- Vous pouvez examiner la demande d’Enbridge Gas sur le site Web de la CEO dès maintenant.
- Vous pouvez déposer une lettre de commentaires qui sera prise en compte au cours de l’audience.
- Vous pouvez participer à titre d’intervenant. En tant qu’intervenant, vous pouvez poser des questions sur la demande d’Enbridge Gas et présenter des raisons pour lesquelles la CEO devrait approuver la demande d’Enbridge Gas. Inscrivez-vous au plus tard le **11 mai 2020**, faute de quoi l’audience aura lieu sans votre participation et vous ne recevrez plus d’avis dans le cadre de ce dossier.
- Vous pourrez consulter la décision rendue par la CEO à l’issue de la procédure ainsi que les motifs de sa décision sur notre site Web.

EN SAVOIR PLUS

Le numéro de référence de ce dossier est **EB-2019-0294**. Pour obtenir de plus amples renseignements sur cette audience, sur les démarches à suivre pour déposer une lettre de commentaires, participer en tant qu’intervenant ou pour consulter les documents relatifs à cette affaire, veuillez sélectionner le numéro de dossier **EB-2019-0294** dans la liste sur le site Web de la CEO : <https://www.oeb.ca/fr/participez/applications/requetes-tarifaires-en-cours>. Pour toute question, vous pouvez également communiquer avec notre centre des relations avec les consommateurs au 1 877 632-2727.

AUDIENCES ORALES OU AUDIENCES ÉCRITES

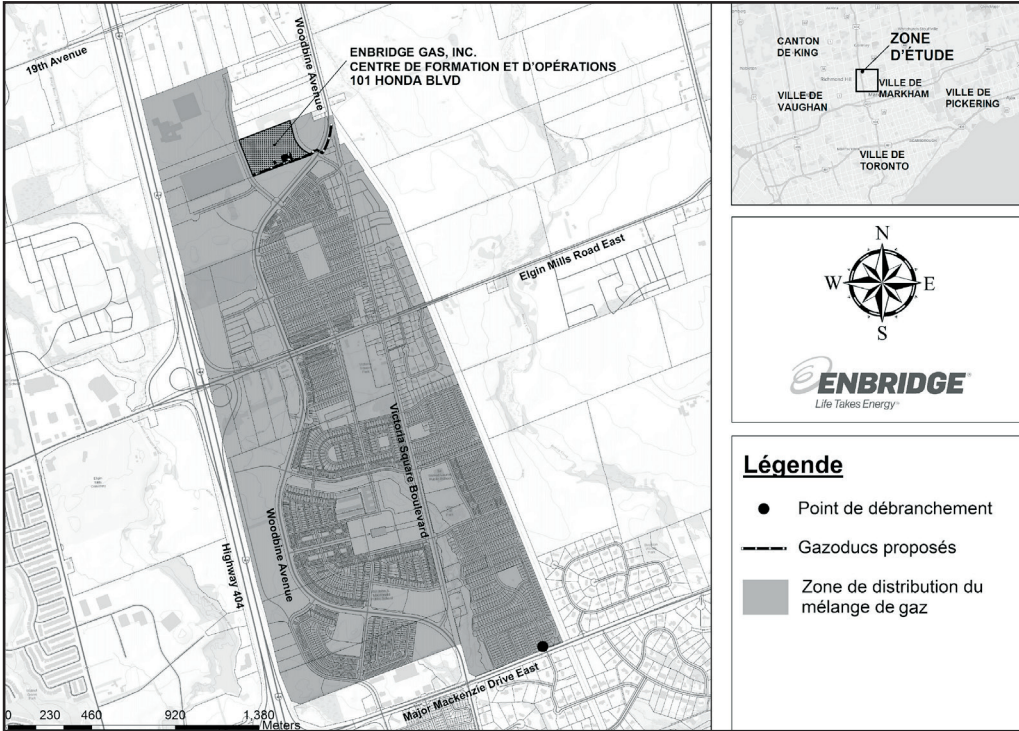

Il existe deux types d’audiences à la CEO : les audiences orales et les audiences écrites. Enbridge Gas a demandé une audience écrite. La CEO examine cette demande à l’heure actuelle. Si vous pensez qu’une audience orale est nécessaire, vous pouvez justifier votre demande par écrit à la CEO avant le **11 mai 2020**.

PROTECTION DES RENSEIGNEMENTS PERSONNELS

Si vous écrivez une lettre de commentaires, votre nom et le contenu de cette lettre seront ajoutés au dossier public et au site Web de la CEO. Toutefois, votre numéro de téléphone, votre adresse de domicile et votre adresse électronique ne seront pas rendus publics. Si vous représentez une entreprise, tous les renseignements de l’entreprise demeureront accessibles au public. Si vous participez à titre d’intervenant, tous vos renseignements personnels seront rendus publics.

Cette audience sur les tarifs sera tenue en vertu des articles 90(1), 97 et 36 de la Loi de 1998 sur la Commission de l’énergie de l’Ontario, L.O. 1998, chap. 15 (annexe B).

Enbridge Gas Inc. (Enbridge Gas) has identified an opportunity which will allow the gas distribution system to contribute towards reducing the environmental impacts of greenhouse gas emissions (GHG) in Ontario by injecting a controlled quantity of hydrogen into the natural gas stream. This opportunity, which is consistent with the environmental goals of public policy locally, provincially and federally, with Enbridge Gas's corporate strategy, and with direction provided by the OEB, is called the Low Carbon Energy Project (LCEP or the Project).

On March 31, 2020, Enbridge Gas filed an application with the Ontario Energy Board (OEB) for an order or orders granting leave to construct natural gas distribution pipelines and ancillary facilities to enable its Low Carbon Energy Project in the City of Markham, and for an order or orders approving a rate rider to be applied to customers impacted by the Low Carbon Energy Project.

On April 21, 2020, the OEB issued the Notice of Application and the Letter of Direction for the proceeding. The OEB has directed Enbridge Gas to serve a copy of the Notice of Application along with Enbridge Gas' Application and the following Evidence on all property owners and encumbrancers with lands or interest in lands directly affected by the project.

A-2-1 – Application

B-1-1 – Purpose, Need, Proposed Facilities & Timing

Good morning,

On April 29, 2020, I sent the email below to you all notifying you of a Project that Enbridge filed with the Ontario Energy Board, called the Low Carbon Energy Project. Because the attachments exceed the size my email could handle, I sent this email via 'Enbridge File Transfer'. For convenience, I have attached the Notice of Application to this email. To view the evidence, please refer to the email I sent on April 29, 2020.

Can I please ask that you respond to my email of last week to confirm receipt.

-

Thank you!

Hi Graham,

The link takes you to our projects page. Once you click on the link, scroll down to the "Low Carbon Energy Project" – click on the drop arrow on the right, and scroll down to "Leave to Construct" and you will see the links to the evidence.

Please reach out again if you are still having issues accessing.

<https://www.enbridgegas.com/LCEP>

Thanks, Stephanie

Good morning,

On April 29, 2020, I sent the email below to you all notifying you of a Project that Enbridge filed with the Ontario Energy Board, called the Low Carbon Energy Project. Because the attachments exceed the size my email could handle, I sent this email via 'Enbridge File Transfer'. For convenience, I have attached the Notice of Application to this email. To view the evidence, please refer to the email I sent on April 29, 2020.

Can I please ask that you respond to my email of last week to confirm receipt.

To: All property owners and encumbrancers with lands or interest in lands

Enbridge Gas Inc. (Enbridge Gas) has identified an opportunity which will allow the gas distribution system to contribute towards reducing the environmental impacts of greenhouse gas emissions (GHG) in Ontario by injecting a controlled quantity of hydrogen into the natural gas stream. This opportunity, which is consistent with the environmental goals of public policy locally, provincially and federally, with Enbridge Gas's corporate strategy, and with direction provided by the OEB, is called the Low Carbon Energy Project (LCEP or the Project).

On March 31, 2020, Enbridge Gas filed an application with the Ontario Energy Board (OEB) for an order or orders granting leave to construct natural gas distribution pipelines and ancillary facilities to enable its Low Carbon Energy Project in the City of Markham, and for an order or orders approving a rate rider to be applied to customers impacted by the Low Carbon Energy Project.

On April 21, 2020, the OEB issued the Notice of Application and the Letter of Direction for the proceeding. The OEB has directed Enbridge Gas to serve a copy of the Notice of Application along with Enbridge Gas' Application and the following Evidence on all property owners and encumbrancers with lands or interest in lands directly affected by the project.

- A-2-1 – Application
- B-1-1 – Purpose, Need, Proposed Facilities & Timing
- E-1-1 – Land Requirements & Agreements

Attached please find a copy of the OEB's Notice of Application (English and French) along with Enbridge Gas' Application and the above noted pieces of evidence as filed with the OEB for the Low Carbon Energy Project. A paper copy of all of the Evidence filed in this proceeding is available upon request or can be viewed by accessing the link below:

Good morning [REDACTED],

As part of the OEB's regulatory application process, on April 30th, Regulatory Affairs served each First Nation with the Notice of Project Application. Regulatory Affairs typically couriers hard copies of the Project application to each First Nation, but due to band office closures, an email was sent instead.

Can I ask that you each follow up with your community contacts to confirm if they received a copy of the LCEP Application and report back to Stephanie (copied on this note) when you have a moment.

The OEB will want confirmation that each community received the Notice.

Thanks, Sonia

Hello [REDACTED]

As discussed, please find the documents associated with Enbridge's application with the Ontario Energy Board (OEB) for an order granting leave to construct ancillary facilities to enable its **Low Carbon Energy Project (LCEP)** in the City of Markham, attached.

Attached please find a copy of the OEB's Notice of Application (English and French) along with Enbridge Gas' Application. Due to size the above noted pieces of evidence, they can be found by accessing the link below. A paper copy of all of the Evidence filed in this proceeding is available upon request.

<https://www.enbridgegas.com/LCEP>

As mentioned on our call, if you could acknowledge receipt of this application, that would be SO helpful. I will send the other documents associated with the NPS 20 Cherry to Bathurst Project in a

separate email.

Appreciate you.

Best,

(Enbridge Gas) has identified an opportunity which will allow the gas distribution system to contribute towards reducing the environmental impacts of greenhouse gas emissions (GHG) in Ontario by injecting a controlled quantity of hydrogen into the natural gas stream. This opportunity, which is consistent with the environmental goals of public policy locally, provincially and federally, with Enbridge Gas's corporate strategy, and with direction provided by the OEB, is called the Low Carbon Energy Project (LCEP or the Project).

On March 31, 2020, Enbridge Gas filed an application with the Ontario Energy Board (OEB) for an order or orders granting leave to construct natural gas distribution pipelines and ancillary facilities to enable its Low Carbon Energy Project in the City of Markham, and for an order or orders approving a rate rider to be applied to customers impacted by the Low Carbon Energy Project.

On April 21, 2020, the OEB issued the Notice of Application and the Letter of Direction for the proceeding. The OEB has directed Enbridge Gas to serve a copy of the Notice of Application along with Enbridge Gas' Application and the following Evidence on all Indigenous communities that have been consulted or with lands or interest in the lands directly affected by the proposed pipeline and related facilities .

- B-1-1 – Purpose, Need, Proposed Facilities & Timing
- E-1-1 – Land Requirements & Agreements
- F-1-1 – Indigenous Consultation

Attached please find a copy of the OEB's Notice of Application (English and French) along with Enbridge Gas' Application. Due to size the above noted pieces of evidence, they can be found by accessing the link below. A paper copy of all of the Evidence filed in this proceeding is available upon request.

Hi [REDACTED] I believe you sent the Notice in English and French and the Application to the communities on my behalf with a link they can access the evidence filed in this proceeding (below). I believe the "1MB" document that Dr. Julie is referring to is the French version of the Notice, attached.

Evidence can be accessed using the link below:

<https://www.enbridgegas.com/About-Us> (click on the Projects tab and scroll to the Low Carbon Energy Project).

Thanks,

Stephanie

Hi [REDACTED]

I just wanted to give you a heads up that my colleague Stephanie Allman will be sending you a copy of the Enbridge Gas' Low Energy Carbon Project that Enbridge Gas recently filed with the Ontario Energy Board. I have been working on this with [REDACTED] (when he was still working at MSIFN).

I reached out to [REDACTED] just before COVID19 hit but since then with all of us working from home, I haven't been able to connect with Monica to confirm if she received the Project application. As such, I suggested Stephanie send it to you and Colleen as a backup.

When you have a moment, can you please confirm that you have received Stephanie's email? I would be happy to provide you with an overview if that helps.

Many thanks!

Hi [REDACTED] [REDACTED] called me back right after I sent this to you.

[REDACTED] says that she hasn't been to the Band Office so she doesn't know if the LTC Application is there. [REDACTED] said that she is aware of the project and they don't have any concerns about the project knowing that it's designed to lower the carbon footprint, which is a good thing. She said that if any of her team has any technical questions she will get back to me, I told her that if they do I will connect them with a project expert to answer any questions they may have.
