Subject: Late intervention request

I am against Enbridge drilling a horizontal well in the Kimball , Colinville gas pool .
1.... They lie and connive to get what they want .

2 ... they lied about a well close to my house , when they done there so-called servaying on gas pool . " Vibration testing is not drille" , it destroyed my house and they think d nothing about it . it's not there problem !

3 ... They drilled another well in my nabours property , but doug slop hole in my property hitting till drain, never even asked ! Never put a liner in it per M.N.R. standards . When they were done drilling , they just filled slop hole in,
Never cleaned pollution up ! They refused to provide proof they properly cleaned up pollution and fixed tile drain . They just lie and hide behind outdated gas lease , they say they only have to make the surface back the way it was before. . That's not acceptable ! Please do not give them a permit untill they correct there wrongs .

4 ... If there allowed a permit to drill horizontal well , they could drill right into the well , That they lied about that's under the edge of my house , this could cause a loss of life in our house hold .

If you allow Enbridge this permit with out doing a complete investigation then O.E.B. is as corrupt as Enbridge is .

Looking to here from you .
