Dear Ms. Long:

**Re: Consultation on Implementing the Process for Enabling Customers  
to Opt Out of Time-of-Use Pricing  
Board File Number: EB-2020-0152**

---

The Independent Electricity System Operator ("IESO") is writing to request three staff of the Smart Metering Entity ("SME") be granted participant status in the above noted initiative. Additionally, Mr. Chong-Tai and Mr. Murphy volunteer for the TOU Customer Choice Working Group that the OEB will establish.

The IESO has a direct interest in these initiatives based on its responsibility for operating the meter data management repository ("MDM/R"). The MDM/R is the province's central platform for smart meter data and processes all electricity consumption data that is used for residential and small general service customers (<50kW) billing by Ontario's local distribution companies ("LDCs"). This central model ensures consistent, rigorous data processing for all LDC customers with smart meters.
