**EB-EB-2020-0135 – Enbridge Gas Inc. (“Enbridge Gas”) 2020 Annual Update to 5 Year Gas Supply Plan
Pollution Probe Letter of Comment**

Dear Ms. Long:

Pollution Probe is in receipt of Enbridge’s letter dated June 24, 2020 on the above-noted proceeding. Pollution Probe was unable to find any documentation or process on the OEB’s site (RESS) pertaining to EB-2020-0135. In the absence of a defined process, Pollution Probe would like to share the following comments.

Enbridge requests that the OEB forego a stakeholder conference relating to its 2020 Annual Update in part due to market volatility and the fact that more than half the year is over. Enbridge also recommends that the process be moved up in 2021. Pollution Probe supports moving up the annual review of the Gas Supply Plan to as early as possible to ensure that any feedback or changes can be applied. Updates to the 5 Year Gas Supply Plan provide a critical foundation for reviews in many other proceedings (e.g. Voluntary RNG Program, Clean Energy (hydrogen) Project, Dawn-Parkway Expansion, Project, etc.). Many specific details related to the evolving portfolio of supply options were not available during the review of the Gas Supply Plan in EB-2019-0137 and understanding how those fit into the integrated gas supply plan would bring value.

Respectfully submitted on behalf of Pollution Probe.
