Cooperative Hydro Embrun Inc.

2021 IRM APPLICATION EB-2020-0011

Submitted on: September 10, 2020

Revised September 23, 2020

Coopérative Hydro Embrun 821 Notre Dame Rue, Embrun, ON (613) 443-5110

September 10, 2020

Ontario Energy Board P.O. Box 2319 27th Floor 2300 Yonge Street Toronto, Ontario M4P 1E4

Attention: Ms. Christine Long, Board Secretary Regarding: 2021 IRM Application (EB-2020-0011)

Dear Ms. Long,

Cooperative Hydro Embrun Inc. is pleased to submit to the Ontario Energy Board its 2021 IRM Application in searchable format. This application is being filed pursuant to the Board's e-Filing Services.

Hard copies of the application will be sent to the OEB's offices via within a week.

We would be pleased to provide any further information or details that you may require relative to this application.

Yours truly,

[original signed]

Benoit Lamarche, General Manager Coopérative Hydro Embrun 821 Notre Dame Rue Russell, ON (613) 443-5110

IN THE MATTER OF the Ontario Energy Board Act, 1998, S.O.

1998, c.15, (Schedule B); AND IN THE MATTER OF an

Application by Cooperative Hydro Embrun Inc. to the Ontario Energy Board for an Order or Orders approving or fixing just and reasonable distribution rates and other service charges to be effective January 1, 2021.

1. INTRODUCTION

- 2 Cooperative Hydro Embrun Inc. hereby applies to the Ontario Energy Board (the "Board")
- 3 for approval of its 2021 Distribution Rate Adjustments effective January 1, 2021.
- 4 Cooperative Hydro Embrun applies for an Order or Orders approving the proposed
- 5 distribution rates and other charges as set out in Appendix 2 of this Application as just
- and reasonable rates and charges pursuant to Section 78 of the OEB Act, The rates
- 7 adjustment being applied for affects all classes of Cooperative Hydro Embrun's customer
- 8 base; Residential, General Services both less than 50K and 50kW to 4999kW, Unmetered
- 9 Scattered Load, Street Lights.
- 10 Cooperative Hydro Embrun has followed Chapter 3 of the Board's Filing Requirements for
- 11 Transmission and Distribution Applications dated May 14, 2020 along with the Key
- References listed at section 3.1.1 of the Chapter 3 Incentive Rate-Setting Applications.
- 13 This application is supported by the following Excel models which are filed in conjunction
- 14 with the Manager Summary.
- 2021 IRM Rate Generator
- 2021 GA Analysis Workform
- 2021 IRM Checklist
- The following models are not application in this application and therefore are not
- 19 being submitted.
- 20 2021 1595
- 2021 Revenue to Cost Ratio Adjustment Model
- 22 2021 ICM/ACM Model
- 23 2021 LRAM

- 1 In the event that the Board is unable to provide a Decision and Order in this Application
- 2 for implementation by the Applicant as of January 1, 2021, Cooperative Hydro Embrun
- 3 requests that the Board issue an Interim Rate Order declaring the current Distribution
- 4 Rates and Specific Service Charges as interim until the decided implementation date of
- 5 the approved 2021 distribution rates. If the effective date does not coincide with the
- 6 Board's determined implementation date for 2021 distribution rates and charges,
- 7 Cooperative Hydro Embrun requests to be permitted to recover the incremental revenue
- 8 from the effective date to the implementation date.
- 9 Cooperative Hydro Embrun requests that this application be disposed of by way of a
- 10 written hearing. Cooperative Hydro Embrun confirms that the billing determinants used
- in the model are from most recent reported RRR filings. The utility reviewed both the
- 12 existing "Tariff Sheets" and billing determinants in the pre-populated worksheets and
- 13 confirms that they were accurate.
- 14 In the preparation of this application, Cooperative Hydro Embrun used the 2021 IRM Rate
- 15 Generator issued on July 14, 2020. The rate and other adjustments being applied for and
- as calculated through the use of the above models include a Price Cap Incentive Rate-
- 17 Setting ("Price Cap IR") option to adjust its 2021 rates. (The Price Cap IR methodology
- provides for a mechanistic and formulaic adjustment to distribution rates and charges in
- 19 the period between Cost of Service applications). The model also adjusts Retail
- 20 Transmission Service Rates in accordance with Board Guideline G-2008-0001 Electricity
- 21 Distribution Retail Transmission Service Rates revised on June 28, 2012 and subsequent
- 22 updates when applicable.
- 23 Cooperative Hydro Embrun also applies for the following matter;
 - Continuance of the Specific Services charges and Loss Factors.
 - Continuance of the MicroFit monthly charge.
 - Continuance of the Smart Meter Entity charge.
- 27 The annual adjustment mechanism is not being applied to the following components of
- 28 delivery rates:

24

25

- Rate Adders, Rate Riders, Low Voltage Service Charges, Retail Transmission
- 30 Service Rates, Wholesale Market Service Rate, Rural and Remote Rate
- Protection Benefit and Charge, Standard Supply Service Administrative

5

Revised September 23, 2020

1	Charge, MicroFIT Service Charge, Specific Service Charges, Transformation and
2	Primary Metering Allowances, Smart Metering Entity Charge
3 4	CHEI recognizes that the utility, its shareholder and all its customer classes will be affected by the outcome of the herein application.

2. DISTRIBUTOR'S PROFILE

- 2 Cooperative Hydro Embrun is a Cooperative that is owned by the people who use its services
- 3 and carries on the business of distributing electricity within the Town of Embrun. Cooperative
- 4 Hydro Embrun's customers total approximately 2355 and is comprised of over 92% residential
- 5 customers while 8% are General Service classes. The balance of the utility's customer base is
- 6 comprised of Street Lights and Unmetered Scattered Load
- 7 Cooperative Hydro Embrun relies on approximately 36 km of circuits and delivers energy and
- 8 power to approximately 2355 customers. Cooperative Hydro Embrun's circuits include
- 9 approximately 18 km of overhead lines and 18 km of underground line, all carrying a voltage of
- 10 less than or equal to 4.8 kV circuits.
- 11 Cooperative Hydro Embrun's last Cost of Service application was for rates effective January 1,
- 12 2018.

13

3. CONTACT INFORMATION

- 2 This application and all documents related to this application will be made available on CHEI's
- 3 website at: www.hydroembrun.ca. The application will also be available on the OEB's website at
- 4 www.ontarioenergyboard.ca, under Board File Number EB-2020-0011. The primary contact for
- 5 the herein application is;

- 6 Benoit Lamarche, General Manager,
- 7 Coopérative Hydro Embrun Inc.
- 8 821 rue Notre-Dame
- 9 Suite 200
- 10 Embrun, ON
- 11 K0A 1W1
- 12 Tel: 613-443-5110
- 13 www. hydroembrun.ca
- 14 The alternate contact for the application is;
- 15 Manuela Ris-Schofield
- 16 Tandem Energy Services Inc.
- 17 Tel: 519-856-0080
- 18 Mobile: 416-562-9295

4. PRICE CAP ADJUSTMENT

- 2 As per Board policy (Chapter 3), distribution rates are to be adjusted according to the Price Cap
- 3 model presented through the Board's Rate Generator model. The calculation would be based
- 4 on the annual percentage change in the GDP-IPI index.
- 5 In accordance with the Report of the Board: Rate Setting Parameters and Benchmarking under
- 6 the Renewed Regulatory Framework for Ontario's Electricity Distributors, Cooperative Hydro
- 7 Embrun was assigned Stretch Factor Group I with a Price Escalator of 2.00, Price Cap Index of
- 8 2.00% and a Stretch Factor Value of 0.00%.
- 9 The following table shows Cooperative Hydro Embrun's applicable factor for its Price Cap
- 10 Adjustment.

11

1

Table 1 - Price Cap Parameters

Stretch Factor Group	I
Set Price Escalator	2.00%
Revised Price Escalator	0.00%
Stretch Factor Value	0.00%
Productivity Factor	0.00%
Price Cap Index	2.00%

- 12 While the price factor adjustment under this application would apply to the fixed and volumetric
- distribution rates for Cooperative Hydro Embrun, it would not affect the following:
 - Rate adders and riders; Low voltage service charges; Retail Transmission Service
 Rates; Wholesale Market Service Rate; Rural Rate Protection Charge; Standard Supply
 Service Administrative Charge; MicroFIT Service Charge; Specific Service Charges.

17

14

15

5. REVENUE TO COST RATIO ADJUSTMENT

- 2 Cooperative Hydro Embrun is not proposing to adjust its revenue to cost ratios in this
- 3 proceeding as its revenue to cost ratios were recently adjusted and set as part of the 2018 Cost
- 4 of Service Application. As such, CHEI has not complete nor is filing a completed revenue-to-cost
- 5 ratio adjustment work form.

1

7

9

10

6 CHEI confirms that its distribution rates are fully fixed.

Table 2- Current vs Proposed Distribution Rates

Rate Class	Current MFC	Current Volumetric Charge	umetric P		Proposed Volumetric Charge
Residential	36.63	charge		37.36	0.0000
Residential	30.03			37.30	0.0000
GS<50 kW	21.86	0.0183		22.30	0.0187
GS>50 kW	190.51	4.0488		194.32	4.1298
USL	21.91	0.015		22.35	0.0153
Street Lighting	2.31	20.9565		2.36	21.3756
MicroFit	10			10	

8 The 2021 proposed tariff sheet is presented at Appendix 2 of this application.

6. RTSR ADJUSTMENT

- 11 Cooperative Hydro Embrun is applying for an adjustment of its Retail Transmission Service Rates
- 12 based on a comparison of historical transmission costs adjusted for new UTR levels and
- 13 revenues generated from existing RTSRs. This approach is expected to minimize variances in the
- 14 USoA Accounts 1584 and 1586.
- 15 Cooperative Hydro Embrun used the RTSR Adjustment Worksheets embedded in the IRM
- 16 Model, to determine the proposed adjustments to the current Retail Transmission Service Rates.
- 17 The Loss Factor applied to the metered kWh is the actual Board-approved 2018 Loss Factor.
- 18 The proposed adjustments of the Retail Transmission Service Rates are shown in the table below
- and the detailed calculations can be found in the 2021 IRM Model filed in conjunction with this
- 20 application.

1

Table 3- Proposed RTSR

Retail Transmission Rate - Network Service Rate			
		Current	Proposed
Rate Description	Unit	RTSR-	RTSR-
		Network	Network
Residential	\$/kWh	0.0075	0.0071
GS<50 kW	\$/kWh	0.0069	0.0065
GS>50 kW	\$/kWh	2.7849	2.6229
USL	\$/kW	0.0069	0.0065
Street Lighting	\$/kW	2.1004	1.9782

2

Retail Transmission Rate - Line and Transformation Connection Service Rate			
		Current	Proposed
Rate Description	Unit	RTSR-	RTSR-
		Connection	Connection
Residential	\$/kWh	0.0065	0.0061
GS<50 kW	\$/kWh	0.0056	0.0052
GS>50 kW	\$/kWh	2.2761	2.1243
USL	\$/kW	0.0056	0.0052
Street Lighting	\$/kW	1.7596	1.6422

3

7. DEFERRAL AND VARIANCE ACCOUNT

7.1 REVIEW AND DISPOSITION OF GROUP 1 DVA

- 3 Cooperative Hydro Embrun has completed the Board Staff's 2021 IRM Rate Generator –
- 4 Tab 3 Continuity Schedule and the threshold test shows a claim per kWh of \$(0.0051).
- 5 CHEI confirms that the billing determinants, which originate from the most recent RRR
- 6 filings are accurate.

1

2

18

- 7 The Report of the Board on Electricity Distributors' Deferral and Variance Account
- 8 Review Report (the "EDDVAR Report") provides that during the IRM plan term, the
- 9 distributor's Group 1 audited account balances will be reviewed and disposed if the pre-
- set disposition threshold is exceeded. Since the threshold was met Cooperative Hydro
- 11 Embrun is therefore seeking disposal of its deferral and variance account in this
- 12 proceeding. The Cooperative Hydro Embrun Group 1 total claim balance is \$(146,210)
- and is comprised of the following account balances. Details of these balances can be
- 14 found in the 2021 IRM Model.
- 15 CHEI notes that there are not variances between the RRR and the balances calculated in
- that tab 3 of the model and therefore no explanation of variance between amounts
- 17 proposed for disposition and amounts reported in RRR for each account is required

Table 4- Deferral and Variance Account balances

Group 1 Accounts		
LV Variance Account	1550	42,005
Smart Metering Entity Charge Variance Account	1551	(1,708)
RSVA - Wholesale Market Service Charge5	1580	(4,091)
Variance WMS – Sub-account CBR Class A5	1580	0
Variance WMS – Sub-account CBR Class B5	1580	9,226
RSVA - Retail Transmission Network Charge	1584	(16,236)
RSVA - Retail Transmission Connection Charge	1586	(1,086)
RSVA - Power4	1588	(174,791)
RSVA - Global Adjustment4	1589	471
Disposition and Recovery/Refund of Regulatory Balances (2012)3	1595	0
Disposition and Recovery/Refund of Regulatory Balances (2013)3	1595	0

Revised September 23, 2020

Disposition and Recovery/Refund of Regulatory Balances (2016)3	1595	0
Disposition and Recovery/Refund of Regulatory Balances (2017)3	1595	0
Group 1 Sub-Total (including Account 1589 - Global Adjustment)		0

CHEI confirms the following.

- Accounts 1595 Disposition of Regulatory Balances (2016 and 2018 are not being disposed of in the claim above as the rate riders have not expired yet and the year end balances and have not been audited therefore, the audited balances will be disposed of in future years.
- CHEI confirms that no adjustment has been made to balances previously approved by the OEB on a final basis.
- GA rate riders calculated on an energy basis (kWh) (not applicable in this case)
- The proposed rate riders sought for recovery or refund of balances that are proposed for disposition over the default period of one year.
- CHEI confirms that it used the OEB model which creates a separate rate rider included in the delivery component of the bill that applies prospectively to Non-RPP Class B customers when clearing balances from the GA Variance Account.
- CHEI confirms that the GA is calculated on a kWh basis.

Revised September 23, 2020

- CHEI confirms that it is requesting that its balances previously approved on an interim basis be approved on a final basis including balances at end of 2017.
- 18 CHEI confirms that it has completed and filed along with this Manager Summary the GA workform.

7.2 WHOLESALE MARKET PARTICIPANT

- 21 CHEI does not have any wholesale market participant (WMP) which can be described as any
- 22 entity that participates directly in any of the Independent Electricity System Operator (IESO)
- 23 administered markets. These participants settle commodity and market-related charges with the
- 24 IESO even if they are embedded in a distributor's distribution system. The rate rider has been
- 25 calculated on Class B customers only. The billing determinant and all the rate riders for the GA
- are calculated on an energy basis (kWh) regardless of the billing determinant used for
- 27 distribution rates for the particular class

7.3 DISPOSITION OF ACCOUNT 1595

29 CHEI is not proposing to dispose of any 1595 balances as part of this application.

- 1 The 2016 audited balances which were approved as part of CHEI's 2018 Cost of Service
- 2 Applications were approved on a 3-year basis and as such have not reached sunset plus
- 1 year. The 2017 audited balances which were approved as part of CHEI's 2019 IRM
- 4 Application will reach its sunset at the end of this rate year. However, they will not be
- 5 audited; therefore, CHEI is not seeking to dispose of it.
- 6 The 2018 balances are still being collected. The sunset will be reached at December
- 7 2020.

8

Table 5 – Disposition Status of Account 1595

Year	Rate Application	Disposition Period	Sunset Reached	Rate Ride Sunset Date	Audited	Plus 1 year
2016	2018	3 yrs.	Х	2020/12/31	Χ	Х
2017	2019	1 yr.	✓	2019/12/31	✓	Х
2018	2020	1 yr.	Х	2020/12/31	Х	Х
2019	2021	1 yr.	X	2021/12/31	Χ	Х

- All filing requirements related to 1595 including populating the 1595 Workform are not
- 11 applicable in this case.
- 12 CHEI also confirms that there are no residual balances for vintage Account 1595 being
- disposed of and that all historical dispositions of 1595 have only been done once.
- 14 CHEI confirms that there are no material residual balances which require further analysis,
- 15 consisting of separating the components of the residual balances by each applicable
- 16 rate rider and by customer rate class.
- 17 As such, CHEI does not need to provide detailed explanations for any significant residual
- 18 balances attributable to specific rate riders for each customer rate class including

- 1 volume differences between forecast volumes (used to calculate the rate riders) as
- 2 compared to actual volumes at which the rate riders were billed.¹

7.4 GLOBAL ADJUSTMENT

- 4 Establishment of a separate rate rider included in the delivery component of the bill that
- 5 would apply prospectively to Non-RPP Class B customers when clearing balances from
- 6 the GA Variance Account.

3

11

- 7 For each year that the accumulated balance of Account 1589 has not been disposed,
- 8 regardless of whether or not distributors are seeking disposition of Group 1 accounts in
- 9 the current proceeding, all distributors are required to file the GA Analysis Workform in
- 10 live Excel format and explain discrepancies.

7.5 COMMODITY ACCOUNTS 1588 AND 1589

- 12 CHEI confirm that the billing determinant and all the rate riders for the GA are calculated
- on an energy basis (kWh) regardless of the billing determinant used for distribution
- 14 rates for the particular class.
- 15 CHEI confirm that the OEB's February 21, 2019 guidance was fully implemented as of
- 16 January 1, 2019.
- 17 Because CHEI process was different from the guidance's step by step, CHEI needed to
- 18 confirm how to properly apply the guidance, it sought assistance with the new
- implementation guidelines in November 2019, when CHEI was in the process of
- answering the OEB's follow-up questions regarding the balances submitted as part of its
- 21 2020 IRM.
- 22 Per internal analysis, the new guidance would assess the correct variation for Account
- 23 1589 but would differ from expectations.

¹ MFR - Material residual balances will require further analysis, consisting of separating the components of the residual balances by each applicable rate rider and by customer rate class. Distributors are expected to provide detailed explanations for any significant residual balances attributable to specific rate riders for each customer rate class. Explanations must include for example, volume differences between forecast volumes (used to calculate the rate riders) as compared to actual volumes at which the rate riders were billed.

- 1 In a communication to the OEB in the November 2019, CHEI describes its internal
- 2 verification of the variances since the total amount of the electricity billed to the
- 3 customers (excludes the distribution fees) must corresponds to the amount invoiced by
- 4 Hydro One.
- 5 When a variance occurs, the difference is noted in accounts 1588/1589. Per the GA
- 6 Analysis, the 1589 variances are within expectations, as per previous submitted GA
- 7 Analysis and also in the 2021 IRM's GA Analysis. As such, this counter verification helps
- 8 support that the variances in 1588 are also accurate.
- 9 Although a certain amount of time was lost as a result of COVID-19 guarantine, the
- 10 utility was eventually able to meet with BDO Canada, their auditor, at the end of June
- 11 2020 to review the guidance and accounts 1588/1589.
- 12 The purpose of the meeting was to understand the variances occurring between the
- OEB's guidance and internal verifications. Several emails were sent to the OEB's
- 14 accounting department in June of 2020 requesting clarification. As of the date of the
- 15 filing, CHEI has not received a response from the OEB. Until such time, CHEI opted to
- use its internal verification for account 1588. CHEI confirms that for account 1589, the
- 17 OEB's guidance was used as the internal process and OEB's guidance were similar on a
- 18 monthly basis.
- 19 CHEI confirms that its balances have not been approved on a final basis since its last
- 20 Cost of Service in 2018.
- 21 I, Benoit Lamarche, certify that CHEI has a robust process and sufficient internal controls
- 22 in place for the preparation, review, verification, and oversight of account balances
- being proposed for disposition to the best of its knowledge and understanding of the
- 24 requirements and guidelines.
- 25 In accordance with the filing requirements which state that for each year that the
- accumulated balance of Account 1589 has not been disposed, regardless of whether or
- 27 not distributors are seeking disposition of Group 1 accounts in the current proceeding,
- 28 all distributors are required to file the GA Analysis Workform in live Excel format and
- 29 explain discrepancies, CHEI confirms that it has filed the GA workform with the required
- years. The GA Calculations for 2019 are presented below. 2017 and 2018 can be found in
- 31 the Excel version of the worksheet.

- 1 The following information was requested by the OEB and provided by CHEI's
- 2 auditors BDO.
- 3 **Process:**
- 4 CHEI confirm that the OEB's February 21, 2019 guidance was fully implemented as of
- 5 January 1, 2019 and was used retrospectively.
- 6 Because CHEI process was different from the guidance's step by step, CHEI needed to
- 7 confirm how to properly apply the guidance, it sought assistance with the new
- 8 implementation guidelines in November 2019, when CHEI was in the process of answering
- 9 the OEB's follow-up questions regarding the balances submitted as part of its 2020 IRM.
- 10 Per internal analysis, the new guidance would assess the correct variation for Account
- 11 1589 but would differ from expectations
- 12 In a communication to the OEB in the November 2019, CHEI describes its internal
- 13 verification of the variances since the total amount of the electricity billed to the customers
- 14 (excludes the distribution fees) must corresponds to the amount invoiced by Hydro One.
- 15 When a variance occurs, the difference is noted in accounts 1588/1589. Per the GA
- 16 Analysis, the 1589 variances are within expectations, as per previous submitted GA
- 17 Analysis and also in the 2021 IRM's GA Analysis. As such, this counter verification helps
- 18 support that the variances in 1588 are also accurate.
- 19 Although a certain amount of time was lost as a result of COVID-19 quarantine, the utility
- 20 was eventually able to meet with BDO Canada, their auditor, at the end of June 2020 to
- 21 review the guidance and accounts 1588/1589.
- 22 The purpose of the meeting was to understand the variances occurring between the OEB's
- 23 quidance and internal verifications. Several emails were sent to the OEB's accounting
- 24 department in June of 2020 requesting clarification. As of the date of the filing, CHEI has
- 25 not received a response from the OEB. Until such time, CHEI opted to use its internal
- verification for account 1588. CHEI confirms that for account 1589, the OEB's guidance
- 27 was used as the internal process and OEB's quidance were similar on a monthly basis.

Results:

- 2 The internal review results for 2018 dispositions were submitted to the accounting
- 3 department during the follow-up questions of the 2020 IRM in November 2019. The
- 4 results, which were provided as a quick reference to the OEB's question on why the 1588
- 5 account included a variance of \$66,423 showed that the variation between the rates of 1st
- 6 estimate and actual, CHEI was able to show an explanation of \$61,156 from the \$66,423.
- 7 The difference consisting of other factors, which were excluded from the results in order to
- 8 simplify the analysis.
- 9 Details are illustrated in the excel file **1588 variation breakdown.xls**
- 10 Since it's been shown that the variance of 1589 is accurate (refer to GA Analysis
- submitted in the past and also in the 2021 IRM) and that, per the process, the electricity
- 12 billed to the customers (excludes the distribution fees) must corresponds to the amount
- 13 invoiced by Hydro One, CHEI concluded that the variation of 1588 was also accurate.
- 14 Based on the results above and the process, there were no adjustments made to prior
- 15 historical balances.

3

5 2016 to 2018 which were filed as part of previous applications are also presented in the excel version of the GA workform and at Appendix X

7.7 CAPACITY BASED RECOVERY

- 2 CHEI is proposing to dispose of Account 1580 sub-account CBR Class B in accordance
- 3 with the OEB's CBR Accounting Guidance. As an embedded distributor, CHEI confirms that
- 4 it is not charged CBR but in accordance with instructions from Board Staff in previous
- 5 applications, CHEI does calculate its CBR balances and tracks in in its subaccount.

7.8 DISPOSITION OF LRAMVA

- 8 As a result of the Minister of Energy, Northern Development and Mines' directive on
- 9 March 20, 2019, the IESO's Conservation First Framework (CFF) was revoked and all
- 10 electricity CDM activity for 2019 and 2020 was centralized and administered by the IESO.
- 11 Given the timing of the announcement and impact on CHEIs plans, targets, and
- 12 contractual agreement, CHEI has opted not to seek any disposal of loss revenues related
- to 2019 conservation savings in this application.
- 14 CHEI confirms that it disposed of its LRAM balances up to 2018 in its 2020 IRM application
- using the IESO's final release of its verified results.

1

6

8. TAX CHANGE

- 2 Cooperative Hydro Embrun has completed worksheets 8 of the IRM model which resulted
- 3 in a tax change of \$269 from the tax rates embedded in its OEB 2018 Board Approved
- 4 base rate. Since the amount is nil, no further action is required.

5

9. ICM/ACM/Z-FACTOR

- Cooperative Hydro Embrun did not apply for an Advanced Incremental module in its last 2
- Cost of Service nor is applying for recovery of Incremental Capital or Z-Factor in this 3
- 4 proceeding.

1

7

14

- 5 CHEI notes that the Minimum Filing Requirements related to ICM / ACM and Z-Factors
- 6 are not applicable in CHEI's case.

10.REGULATORY RETURN ON EQUITY - OFF RAMP

- 8 CHEI's current distribution rates were rebased and approved by the OEB in 2018 and
- 9 included an expected (deemed) regulatory return on equity of 9.00%. The OEB allows a
- distributor to earn within +/- 3% of the expected return on equity. The actual return on 10
- 11 equity for 2018 is 8.12% which indicates an marginal underearning when compared to the
- Board Approved 2018 rate of return, the utility will maintain its profitability at the 12
- 13 approved level going forward.

Table 8- Return on Equity Table

	2018BA	2019
Achieved ROE	9.00	10.03
Deemed ROE	9.00	9.00
Difference	0.00	1.03

- 15 CHEI notes that its earnings are not in excess of the dead band of 300 basis points. ²CHEI's
- 16 actual ROE for 2018 shows an under-earning in comparison to the deemed ROE of 9%
- 17 established as part of the utility's 2018 Cost of Service application.

18

19

20

11. CURRENT TARIFF SHEET

1 Cooperative Hydro Embrun current tariff sheets are provided in Appendix 1.

12.PROPOSED TARIFF SHEET

- 2 The proposed tariff sheets generated by the 2021 IRM Rate Generator are provided in the
- 3 Appendix 2.

1

4

13.BILL IMPACT

- 5 CHEI has opted to recalculate its 10th percentile on a bi-annual basis. The reason being that the
- 6 report is produced by a third party and comes at substantial cost for a small utility. Given that
- 7 the customer composition and count has not materially changed since the utility submitted its
- 8 2020 rate application, the percentile remains the same as it did in 2018. CHEI will update its 10th
- 9 percentile in its next application which will more appropriately reflect the impacts of Covid-19.
- 10 The table below shows the bill impacts. The bill impacts are calculated based on the dollar
- 11 change in Sub-Total C Delivery divided by the total bill before tax at current rates. The
- 12 10% percentile was calculated in the following manner:
- 13 1) The utility produced a report for a recent month which included Residential
 14 Customer Number and their Monthly Consumptions. In this case, CHEI opted
 15 to choose May of 2019 as May is generally a month where the weather is mild
 16 and not subject to extreme cold or warm days.
- 17 2) The report was then sorted by lowest to highest consumption.
- 18 3) Less than 100kWh monthly consumption was removed from the file.
- The utility then calculates the 10th percentile by taking 10% of the customer count (or number of records in the report), (e.g., 200 customers = 200)
- The utility then established that the record in questions produced consumption of 234 kWh/month which in turn became the "ceiling" for the lowest 10th percentile.
- 24 6) The file used to calculate the 10th percentile is attached for your review.
- 25 The total residential bill impact for the 10th percentile level of 234 kWh is 5.24%. The
- residential bill impact for the standard 750kWh is 0.69%. Detailed bill impacts for each
- 27 rate class are provided in Appendix 3
- 28 With the exception of the GS<50, which uses the typical 2000 kWh/month, the other
- 29 classes were calculated using a rounded monthly average consumption.

- 1 Rate Mitigation: CHEI confirms that none of the bill impacts for its classes exceed 10% as
- 2 such no rate mitigation plan is required at this time.

Table 9– Summary of Bill Impacts

RATE CLASSES / CATEGORIES (eg: Residential TOU, Residential Retailer)	Units	Sub-Total						Total	
		Α		В		С		Total Bill	
		\$	%	\$	%	\$	%	\$	%
RESIDENTIAL - RPP	kWh	\$0.14	0.39%	-\$5.26	-10.72%	-\$5.90	-9.78%	-\$4.79	-3.69%

Schedule A

To Decision and Rate Order

Tariff of Rates and Charges

OEB File No: EB-2019-0028

DATED: December 12, 2019

Effective and Implementation Date January 1, 2020

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EB-2019-0028

RESIDENTIAL SERVICE CLASSIFICATION

This classification applies to an account taking electricity at 750 volts or less where the electricity is used exclusively in a separate metered living accommodation. Customers shall be residing in single-dwelling units that consist of a detached house or one unit of a semi-detached, duplex, triplex or quadruplex house, with a residential zoning. Separately metered dwellings within a town house complex or apartment building also qualify as residential customers. All customers are single-phase. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of Ontario Energy Board, and amendments thereto as approved by Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of Ontario Energy Board, and amendments thereto as approved by Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

EB-2019-0028

GENERAL SERVICE LESS THAN 50 KW SERVICE CLASSIFICATION

This classification applies to a non-residential account taking electricity at 750 volts or less whose average monthly maximum demand is less than, or is forecast to be less than, 50 kW. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of Ontario Energy Board, and amendments thereto as approved by Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of Ontario Energy Board, and amendments thereto as approved by Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

EB-2019-0028

GENERAL SERVICE 50 TO 4,999 KW SERVICE CLASSIFICATION

This classification applies to a non-residential account whose average monthly maximum demand used for billing purposes is equal to or greater than, or is forecast to be equal to or greater than, 50 kW but less than 5,000 kW. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of Ontario Energy Board, and amendments thereto as approved by Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of Ontario Energy Board, and amendments thereto as approved by Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of WMS - Sub-account CBR Class B is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to WMP, customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

EB-2019-0028

UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION

This classification applies to an account taking electricity at 750 volts or less whose average monthly maximum demand is less than, or is forecast to be less than, 50 kW and the consumption is unmetered. Such connections include cable TV power packs, bus shelters, telephone booths, traffic lights, railway crossings, etc. The level of the consumption will be agreed to by the distributor and the customer, based on detailed manufacturer information/ documentation with regard to electrical consumption of the unmetered load or periodic monitoring of actual consumption. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of Ontario Energy Board, and amendments thereto as approved by Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of Ontario Energy Board, and amendments thereto as approved by Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

EB-2019-0028

STREET LIGHTING SERVICE CLASSIFICATION

This classification applies to an account for roadway lighting with a Municipality, Regional Municipality, Ministry of Transportation and private roadway lighting, controlled by photo cells. The consumption for these customers will be based on the calculated connected load times the required lighting times established in the approved Ontario Energy Board street lighting load shape template. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of Ontario Energy Board, and amendments thereto as approved by Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of Ontario Energy Board, and amendments thereto as approved by Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

RESIDENTIAL SERVICE CLASSIFICATION

This classification applies to an account taking electricity at 750 volts or less where the electricity is used exclusively in a separate metered living accommodation. Customers shall be residing in single-dwelling units that consist of a detached house or one unit of a semi-detached, duplex, triplex or quadruplex house, with a residential zoning. Separately metered dwellings within a town house complex or apartment building also qualify as residential customers. All customers are single-phase. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of Ontario Energy Board, and amendments thereto as approved by Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of Ontario Energy Board, and amendments thereto as approved by Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

GENERAL SERVICE 50 TO 4,999 KW SERVICE CLASSIFICATION

This classification applies to a non-residential account whose average monthly maximum demand used for billing purposes is equal to or greater than, or is forecast to be equal to or greater than, 50 kW but less than 5,000 kW. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of Ontario Energy Board, and amendments thereto as approved by Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of Ontario Energy Board, and amendments thereto as approved by Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of WMS - Sub-account CBR Class B is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to WMP, customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

Effective and Implementation Date January 1, 2021

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

approved contenties of Natos, onarges and 2000 rations	EB-2020-0011
Service Transaction Requests (STR)	
Request fee, per request, applied to the requesting party	\$ 0.52
Processing fee, per request, applied to the requesting party	\$ 1.04
Request for customer information as outlined in Section 10.6.3 and Chapter 11 of the Retail	
Settlement Code directly to retailers and customers, if not delivered electronically through the	
Electronic Business Transaction (EBT) system, applied to the requesting party	
Up to twice a year	\$ no charge
More than twice a year, per request (plus incremental delivery costs)	\$ 4.16
Notice of switch letter charge, per letter (unless the distributor has opted out of applying the charge as per the	
Ontario Energy Board's Decision and Order EB-2015-0304, issued on February 14, 2019)	\$ 2.08

LOSS FACTORS

If the distributor is not capable of prorating changed loss factors jointly with distribution rates, the revised loss factors will be implemented upon the first subsequent billing for each billing cycle.

Total Loss Factor - Secondary Metered Customer < 5,000 kW	1.0749
Total Loss Factor - Primary Metered Customer < 5,000 kW	1.065

1

Page **10** of **34**

Appendix 3 Bill Impacts

Incentive Rate-setting Mechanism Rate Generator for 2021 Filers

The bill comparisons below must be provided for typical customers and consumption levels. Bill impacts must be provided for residential customers consuming 750 kWh per month and general service customers consuming 2,000 kWh per month and having a monthly demand of less than 50 kW. Include bill comparisons for Non-RPP (retailer) as well. To assess the combined effects of the shift to fixed rates and other bill impacts associated with changes in the cost of distribution service, applicants are to include a total bill impact for a residential customer at the distributor's 10th consumption percentile (In other words, 10% of a distributor's residential customers consume at or less than this level of consumption on a monthly basis). Refer to section 3.2.3 of the Chapter 3 Filling Requirements For Electricity Distribution Rate Applications.

For certain classes where one or more customers have unique consumption and demand patterns and which may be significantly impacted by the proposed rate changes, the distributor must show a typical comparison, and provide an explanation.

Note

- 1. For those classes that are not eligible for the RPP price, the weighted average price including Class B GA through end of May 2020 of \$0.1368/kWh (IESO's Monthly Market Report for May 2020) has been used to represent the cost of power. For those classes on a retailer contract, applicants should enter the contract price (plus GA) for a more accurate estimate. Changes to the cost of power can be made directly on the bill impact table for the specific class.
- 2. Please enter the applicable billing determinant (e.g. number of connections or devices) to be applied to the monthly service charge for unmetered rate classes in column N. If the monthly service charge is applied on a per customer basis, enter the number "1". Distributors should provide the number of connections or devices reflective of a typical customer in each class.
- Note that cells with the highlighted color shown to the left indicate quantities that are loss adjusted.

Notes:

General Data inputs are required on Sheets 3. Data from Sheet 3 will automatically complete calculations on sheets 4 through 9 (Rate Base through Revenue Requirement). Sheets 4 through 9 do not require any inputs except for notes that the Applicant may wish to enter to support the results. Pale green cells are available on sheets 4 through 9 to enter both footnotes beside key cells and the related text for the notes at the bottom of each sheet.

- (1) All inputs are in dollars (\$) except where inputs are individually identified as percentages (%)
- Data in column E is for Application as originally filed. For updated revenue requirement as a result of interrogatory responses, technical or settlement conferences, etc., use column M and Adjustments in column I
- Net of addbacks and deductions to arrive at taxable income.
- (4) Average of Gross Fixed Assets at beginning and end of the Test Year
- Average of Accumulated Depreciation at the beginning and end of the Test Year. Enter as a negative amount.
- Select option from drop-down list by clicking on cell M10. This column allows for the application update reflecting the end of discovery or Argument-in-Chief. Also, the outcome of any Settlement Process can be reflected.
- (7) Input total revenue offsets for deriving the base revenue requirement from the service revenue requirement
- 4.0% unless an Applicant has proposed or been approved for another amount.
- The default Working Capital Allowance factor is **7.5%** (of Cost of Power plus controllable expenses), per the letter issued by the Board on June 3, 2015. Alternatively, a WCA factor based on lead-lag study, with supporting rationale could be provided.

Notes

9

10

Some Applicants may have a unique rate as a result of a lead-lag study. The default rate for 2017 cost of service applications is 7.5%, per the letter issued by the Board on June 3, 2015.

Average of opening and closing balances for the year.

Load Forecast Summary

This spreadsheet provides a summary of the customer and load forecast on which the test year revenue requirement is derived. The amounts serve as the denominators for deriving the rates to recover the test year revenue requirement for purposes of this RRWF.

The information to be input is inclusive of any adjustments to kWh and kW to reflect the impacts of CDM programs up to and including CDM programs planned to be executed in the test year. i.e., the load forecast adjustments determined in **Appendix 2-IB** and in Exhibit 3 of the application.

Appendix 2-IB is still required to be filled out, as it also provides a year-over-year variance analysis of demand growth andf trends from historical actuals to the Bridge and Test Year forecasts.

Stage in Process:

Per Board Decision

Customer Class	
Input the name of each customer class.	Tes
Residential General Service < 50 kW General Service > 50 to 4999 kW Unmetered Scattered Load Street Lighting other other	

Initial Application

9	3,657,814	12,771
17 530	82,356 207,000	605
2,828	29,891,982	13,376

Notes:

Total

Input kW or kVA for those customer classes for which billing is based on demand (kW or kVA) versus energy consumption (kWh)

Cost Allocation and Rate Design

This spreadsheet replaces **Appendix 2-P** and provides a summary of the results from the Cost Allocation spreadsheet, and is used in the determination of the class revenue requirement and, hence, ultimately, the determination of rates from customers in all classes to recover the revenue requirement.

Stage in Application Process: Per Board Decision

A) Allocated Costs

Name of Customer Class (3)	Costs Alloc Previous		%		located Class nue Requirement	%
From Sheet 10. Load Forecast					(1) (7A)	
Residential General Service < 50 kW General Service > 50 to 4999 kW Unmetered Scattered Load Street Lighting other other	\$ \$ \$ \$	687,249 107,690 69,528 5,498 18,461	77.36% 12.12% 7.83% 0.62% 2.08%	\$ \$ \$ \$ \$	892,262 114,604 58,565 4,749 26,813	81.34% 10.45% 5.34% 0.43% 2.44%
Total	\$	888,426	100.00%	\$	1,096,994	100.00%
				\$	1,096,994.35	

- (1) Class Allocated Revenue Requirement, from Sheet O-1, Revenue to Cost || RR, row 40, from the Cost Allocation Study in this application. This excludes costs in deferral and variance accounts. For Embedded Distributors, Account 4750 Low Voltage (LV) Costs are also excluded.
- (2) Host Distributors Provide information on any embedded distributor(s) as a separate class, if applicable. If embedded distributors are billed in a General Service class, include the allocated costs and revenues of the embedded distributor(s) in the applicable class, and also complete Appendix 2-Q.
- (3) Customer Classes If these differ from those in place in the previous cost allocation study, modify the customer classes to match the proposal in the current application as closely as possible.

B) Calculated Class Revenues

Name of Customer Class		Forecast (LF) X ent approved rates		F X current roved rates X (1+d)	LF)	(Proposed Rates	M	scellaneous Revenues
		(7B)		(7C)		(7D)		(7E)
Residential General Service < 50 kW General Service > 50 to 4999 kW Unmetered Scattered Load Street Lighting other other number of the service > 50 to 4999 kW Unmetered Scattered Load Street Lighting other other	\$ \$ \$ \$ \$	869,597 108,608 58,065 4,642 26,424	\$ \$ \$ \$ \$	836,239 123,047 81,487 5,772 20,792	* * * *	839,227 123,109 75,673 5,613 23,713	\$ \$ \$ \$ \$	22,698 5,970 462 109 419
7 8 9 20 Total	= = \$	1,067,336	\$	1,067,336	\$	1,067,336	\$	29,658

⁽⁴⁾ In columns 7B to 7D, LF means Load Forecast of Annual Billing Quantities (i.e., customers or connections, as applicable X 12 months, and kWh, kW or kVA as applicable. Revenue quantities should be net of the Transformer Ownership Allowance for applicable customer classes. Exclude revenues from rate adders and rate riders.

⁽⁵⁾ Columns 7C and 7D - Column Total should equal the Base Revenue Requirement for each.

⁽⁶⁾ Column 7C - The OEB-issued cost allocation model calculates "1+d" on worksheet O-1, cell C22. "d" is defined as Revenue Deficiency/Revenue at Current Rates.

⁽⁷⁾ Column 7E - If using the OEB-issued cost allocation model, enter Miscellaneous Revenues as it appears on worksheet O-1, row 19,

C) Rebalancing Revenue-to-Cost Ratios

Name of Customer Class	Previously Approved Ratios	Status Quo Ratios	Proposed Ratios	Policy Range
	Most Recent Year:	(7C + 7E) / (7A)	(7D + 7E) / (7A)	
	2014			
	%	%	%	%
Residential	107.00%	96.27%	96.60%	85 - 115
General Service < 50 kW	88.00%	112.58%	112.63%	85 - 115
General Service > 50 to 4999 kW	103.00%	139.93%	130.00%	80 - 120
Unmetered Scattered Load	70.00%	123.82%	120.49%	80 - 120
Street Lighting	70.00%	79.11%	90.00%	80 - 120
other				80 - 120
other				80 - 120

⁽⁸⁾ Previously Approved Revenue-to-Cost (R/C) Ratios - For most applicants, the most recent year would be the third year (at the latest) of the Price Cap IR period. For example, if the applicant, rebased in 2012 with further adjustments to move within the range over two years, the Most Recent Year would be 2015. However, the ratios in 2015 would be equal to those after the adjustment in 2014.

⁽⁹⁾ Status Quo Ratios - The OEB-issued cost allocation model provides the Status Quo Ratios on Worksheet O-1. The Status Quo means "Before Rebalancing".

⁽¹⁰⁾ Ratios shown in red are outside of the allowed range. Applies to both Tables C and D.

(D) Proposed Revenue-to-Cost Ratios (11)

Name of Customer Class	Propos	ed Revenue-to-Cost Ratio		Policy Range
	Test Year	Price Cap IR F		, ,
	2018	2019	2020	
Residential	96.60%	96.60%	96.60%	85 - 115
General Service < 50 kW	112.63%	112.63%	112.63%	85 - 115
General Service > 50 to 4999 kW	130.00%	130.00%	130.00%	80 - 120
Unmetered Scattered Load	120.49%	120.49%	120.49%	80 - 120
Street Lighting	90.00%	90.00%	90.00%	80 - 120
other				80 - 120
other				80 - 120
3				
2				
;				
!				
7				
3				

⁽¹¹⁾ The applicant should complete Table D if it is applying for approval of a revenue-to-cost ratio in 2017 that is outside of the OEB's policy range for any customer class. Table D will show that the distributor is likely to enter into the 2018 and 2019 Price Cap IR models, as necessary. For 2018 and 2019, enter the planned revenue-to-cost ratios that will be "Change" or "No Change" in 2017 (in the current Revenue/Cost Ratio Adjustment Workform, Worksheet C1.1 'Decision - Cost Revenue Adjustment, column d), and enter TBD for class(es) that will be entered as 'Rebalance'.

Notes:

Rate Design and Revenue Reconciliation

This sheet replaces Appendix 2-V, and provides a simplified model for calculating the standard monthly and voluemtric rates based on the allocated class revenues and fixed/variable split resulting from the cost allocation study and rate design and as proposed by the applicant. However, the RRWF does not replace the rate generator model that an applicant distributor may use in support of its application. The RRWF provides a demonstrative check on the derivation of the revenue requirement, based on summary information from a more detailed rate generator model and other models that applicants use for cost allocation, load forecasting, taxes/PILs, etc.

tes:																Rates recover reve	nue requirement	Base Revenue Requir	ement	\$ 1,067,335 -\$ 76

% Difference

-0.007%

¹ Transformer Ownership Allowance is entered as a positive amount, and only for those classes to which it applies.

The Fixed/Variable split, for each customer class, drives the "rate generator" portion of this sheet of the RRWF. Only the "fixed" fraction is entered, as the sum of the "fixed" and "variable" portions must sum to 100%. For a distributor that may set the Monthly Service Charge, the "fixed" ratio is calcutated as: [MSC x (average number of customers or connections) x 12 months] / (Class Allocated Revenue Requirement).

Tracking Form

The first row shown, labelled "Original Application", summarizes key statistics based on the data inputs into the RRWF. After the original applicant provides key changes in capital and operating expenses, load forecasts, cost of capital, etc., as revised through the processing of the application. This could be due to revisions or responses to interrogatories. The last row shown is the most current estimate of the cost of service data reflecting the original application and any updates provided by the applicant distributor (for updated evidence, responses to interrogatories, undertakings, etc.)

Please ensure a Reference (Column B) and/or Item Description (Column C) is entered. Please note that unused rows will automatically be hidden and the PRINT AREA set when the PRINT BUTTON on Sheet 1 is activated.

(1) Short reference to evidence material (interrogatory response, undertaking, exhibit number, Board Decision, Code, Guideline, Report of the Board, etc.)

Ontario Energy Board	
GA Analysis Workform	

2016

Account	1589	Global	Adjustment	(GA)	Analyei	e Workform

Input cells Drop down cells		
11	tility Namo	COOPERATIVE HYDRO EMBRUN INC.
U	unty manie	COOPERATIVE HTDRO EMBRON INC.

Note 1

For Account 1589,

a) if the account was last approved on a final basis, select the year that the balance was last approved on a final basis.

b) if the account was last approved on an interim basis, and

i) there are no changes to the previously approved interim balances, select the year that the balances were last approved for diposition on an interim basis. OR

diposition on an interim basis. UK
ii there are changes to the previously approved interim balances, select the year that the balances were last approved for disposition
on a final basis. An explanation should be provided to explain the reason for the change in the previously approved interim balances.

(e.g. If 2017 balances reviewed in the 2019 rate application were to be selected, select 2017)

Instructions:
1) Determine which scenario above applies (a, bi or bii). Select the appropriate year to generate the GA Analysis Workform tabs and the Principal Adjustments tab.

- Principal Adjustments tab.
 For example:

 Scenario a If 2018 balances were last approved on a final basis Select 2018 and a GA Analysis Workform for 2019 will be generated.
 Scenario bi If 2018 balances were last approved on an interim basis and there are no changes to 2018 balances Select 2018 and a GA Analysis Workform for 2019 will be generated.
 Scenario bii If 2018 balances were last approved on an interim basis, there are changes to 2018 balances, and 2017 balances were last approved for disposition Select 2017 and GA Analysis Workforms for 2018 and 2019 will be generated.
 Complete the GA Analysis Workform for each year generated.
 Complete the Principal Adjustments tab. Note that the number of years that require principal adjustment reconciliations are all shown in one Principal Adjustments tab, depending on the year selected on the Information Sheet.

See the separate document GA Analysis Workform Instructions for detailed instructions on how to complete the Workform and examples of reconciling items.

Note 8 Principal adjustment reconciliation in current application

Notes

- 1) The "Transaction" column in the DVA Continuity Schedule is to equal the transactions in the general ledger (excluding transactions relating to the removal of approved disposition amounts as that is shown in a separate column in the DVA Continuity Schedule)
- 2) Any principal adjustments needed to adjust the transactions in the general ledger to the amount that should be requested for disposition should be shown separately in the "Principal Adjustments" column of the

Complete the table below for the current disposition period. Complete a table for each year included in the balance under review in this rate application. The number of tables to be completed is automatically generated based on data provided in the information Sheet
