Hello Shoshana !

I appreciate the response. It begs repeating. Given what everyone is going through with the pandemic and the actions already taken place by Premier Ford , how can a company go forward and ask the OEB for an increase no matter the size ? One would think responsible management would be looking for savings in order to decrease the rates and not increase them. I do hope the OEB rejects this and any other utility that puts forward a request for increase. It's time for the OEB to suggest amalgamation and get rid of all these redundant management jobs, office buildings etc that add to the affordability factor.

respectfully peter

Premier Ford , can you please look into this. I heard a comment you made on TV that applies to this. Given all the problems being caused by the pandemic and the actions you and your government have taken on Hydro Rates , I believe NPEI executives may be a few fries short of a happy meal !!

respectfully peter
