EXHIBIT 8 – RATE DESIGN

8.0 OVERVIEW

1

- 3 This Exhibit documents the calculation of BHI's proposed distribution rates by rate class for the
- 4 2021 Test Year based on the rate design as proposed in this Exhibit 8. The following areas are
- 5 discussed in this Exhibit 8:
- Fixed/Variable Proportion
- 7 Rate Design Policy
- Retail Transmission Service Rates ("RTSRs")
- Retail Service Charges
- Regulatory Charges
- Specific Service Charges
- Low Voltage Service Rates
- Loss Adjustment Factors
- Tariff of Rates and Charges
- 15 Revenue Reconciliation
- Bill Impact Information
- 17 Rate Mitigation

- 19 BHI proposes to recover a service revenue requirement of \$37,220,971 and a base revenue
- requirement of \$35,529,884 as identified in Table 1 below.

Table 1 – 2021 Test Year Service and Base Revenue Requirement

Description	2021 Test Year
OM&A Expenses	\$21,497,775
Depreciation and Amortization	\$6,883,779
Property Taxes	\$341,790
Regulated Return on Capital	\$8,040,451
PILs	\$457,175
Service Revenue Requirement	\$37,220,971
Less Revenue Offsets	(\$1,691,087)
Base Revenue Requirement	\$35,529,884

2

1

- 4 Base Revenue Requirement is allocated to rate classes as identified in Table 2 below. Class
- 5 Revenue Requirements are discussed in further detail in Section 7.2 of Exhibit 7.

6 Table 2 – Proposed Allocation of Base Distribution Revenue to Rate Class

Rate Class	2021 Proposed Base Revenue Requirement	Transformer Allowance	2021 Proposed Gross Distribution Revenue
Residential	\$22,177,594	\$0	\$22,177,594
GS<50 kW	\$4,750,309	\$0	\$4,750,309
GS>50 kW	\$8,336,498	\$514,689	\$8,851,187
Street Lighting	\$179,474	\$0	\$179,474
Unmetered Scattered Load (USL)	\$86,009	\$0	\$86,009
Total	\$35,529,884	\$514,689	\$36,044,573

Filed: October 30, 2020

8.1 FIXED/VARIABLE PROPORTION

2 8.1.1 Current Fixed/Variable Proportion

- 3 BHI provides the current fixed/variable proportion for each rate class in Table 3 below. (GS>50
- 4 kW revenue is gross of the transformer allowance). BHI calculated the current fixed/variable
- 5 proportions by multiplying its existing 2020 OEB-approved distribution rates by the billing
- 6 determinants in its 2021 load forecast.

7 Table 3 – Current Fixed/Variable Proportion

	2021 Billing D	eterminants (Fixed	Variable	
Rate Class	Fixed Distribution Revenue	Variable Distribution Revenue	Total Distribution Revenue	Revenue Proportion	Revenue
Residential	\$19,741,165	\$0	\$19,741,165	100.0%	0.0%
GS<50 kW	\$1,806,895	\$2,421,546	\$4,228,441	42.7%	57.3%
GS>50 kW	\$763,632	\$7,083,019	\$7,846,651	9.7%	90.3%
Street Lighting	\$134,810	\$73,039	\$207,849	64.9%	35.1%
Unmetered Scattered Load (USL)	\$64,710	\$52,447	\$117,157	55.2%	44.8%
Total	\$22,511,211	\$9,630,051	\$32,141,262	70.0%	30.0%

9 **8.1.2 Proposed Fixed/Variable Proportion**

- 10 BHI proposes to use the fixed/variable proportions, as calculated in Table 3, to calculate the
- 11 distribution rates for the 2021 Test Year. Table 4 below identifies the proposed fixed/variable
- 12 proportion for each rate class (GS>50 kW revenue is gross of the transformer allowance).

13 Table 4 – Proposed Fixed/Variable Proportion

	2021 Billing D	@ 2021 Rates	Fixed	Variable	
Rate Class	Fixed Distribution Revenue	Variable Distribution Revenue	Total Distribution Revenue	Revenue Proportion	Revenue
Residential	\$22,177,594	\$0	\$22,177,594	100.0%	0.0%
GS<50 kW	\$2,029,899	\$2,720,410	\$4,750,309	42.7%	57.3%
GS>50 kW	\$868,256	\$7,982,931	\$8,851,187	9.8%	90.2%
Street Lighting	\$116,406	\$63,068	\$179,474	64.9%	35.1%
Unmetered Scattered Load (USL)	\$47,506	\$38,503	\$86,009	55.2%	44.8%
Total	\$25,239,661	\$10,804,913	\$36,044,573	70.0%	30.0%

15 **8.1.3 Proposed Monthly Service Charge**

16 BHI provides its proposed monthly service charge in Table 5 below.

1

- Table 6 below compares BHI's current and proposed monthly fixed charges with the ceiling and
- 5 floor fixed charges as calculated in the cost allocation study. There are no non-residential rate
- 6 classes for which the proposed fixed monthly service charge exceeds the ceiling fixed charge.
- 7 There are no rate classes for which the proposed fixed monthly service charge is lower than the
- 8 floor fixed charge.

9 Table 6 – Monthly Service Charge Comparison

Rate Class	Current 2020 Fixed Monthly Service Charge	Proposed 2021 Fixed Monthly Service Charge	Minimum System with PLCC Adjustment (Ceiling)	Avoided Cost (Floor)
Residential	\$26.51	\$29.78	\$18.22	\$3.98
GS<50 kW	\$27.06	\$30.40	\$31.68	\$9.56
GS>50 kW	\$63.44	\$72.13	\$95.17	\$41.83
Street Lighting	\$0.65	\$0.56	\$3.97	\$0.44
Unmetered Scattered Load (USL)	\$9.73	\$7.14	\$8.70	\$0.49

10

11 8.1.4 Proposed Distribution Volumetric Charge

12 BHI provides its proposed distribution volumetric charge in Table 7 below.

13 Table 7 – Proposed Distribution Volumetric Charge

Rate Class	Total Distribution Revenue	Variable Revenue Proportion	Variable Revenue	Consumption/ Demand	Billing Determinant	Proposed Distribution Volumetric Charge
Residential	\$22,177,594	0.0%	\$0	529,231,270	kWh	\$0.0000
GS<50 kW	\$4,750,309	57.3%	\$2,720,410	167,003,174	kWh	\$0.0163
GS>50 kW	\$8,851,187	90.2%	\$7,982,931	2,267,945	kW	\$3.5199

Burlington Hydro Inc. 2021 Electricity Distribution Rates Application EB-2020-0007 Exhibit 8 Page 9 of 32 Filed: October 30, 2020

8.1.5 Transformer Allowance for Ownership

- 2 BHI is proposing to maintain its current Transformer Allowance for Ownership of \$0.60/kW. The
- 3 Transformer Allowance for Ownership is intended to reimburse customers who own their own
- 4 transformers for the costs of transformation from primary to secondary voltage. BHI provides
- 5 this service and these costs are included in base distribution rates; when a customer owns its
- 6 own transformer it is incurring these costs directly and as such is entitled to receive a credit.

7

8 BHI's estimated transformer allowance for the 2021 Test Year is \$514,689.

8

9

10

11

12

On April 2, 2015, the OEB released its *Board Policy on A New Distribution Rate Design for Residential Electricity Customers*¹, which stated that electricity distributors will transition to a fully fixed monthly distribution service charge for residential customers over a four-year transition period commencing in 2016 and ending in 2019. The OEB directed that "Each distributor will determine its fully fixed charge and will make equal increases in the fixed charge over four years to get to the fully fixed charge. At the same time, the usage charge will be reduced in order to keep the distributor revenue-neutral." BHI incorporated the first, second, third and fourth year transition adjustments in its 2016, 2017, 2018 and 2019 rates respectively; and has completed the transition to a fully fixed monthly distribution service charge for residential customers. As such, distribution rates for BHI's residential rate class are on a fully fixed basis in the 2020 Bridge Year and the 2021 Test Year.

-

¹ EB-2014-0210

Burlington Hydro Inc. 2021 Electricity Distribution Rates Application EB-2020-0007 Exhibit 8 Page 11 of 32 Filed: October 30, 2020

8.3 RETAIL TRANSMISSION SERVICE RATES (RTSRS)

- 2 In preparing this Application, BHI has complied with OEB's Guideline G-2008-0001: Electricity
- 3 Distribution Retail Transmission Service Rates, issued on June 28, 2012 and subsequent
- 4 updates to the Uniform Transmission Rates ("UTRs"). BHI does not incur any sub-transmission
- 5 charges. BHI provides a completed version of the OEB's 2021 RTSR Workform posted May 14,
- 6 2020 as live Excel file Attachment21_2021_RTSR_Workform_BHI_10302020 and as Appendix
- 7 A in this Exhibit 8.

8

- 9 BHI confirms that the information provided in this Exhibit 8 is consistent with that provided in the
- Working Capital Allowance calculation per Section 2.2.1.3 of the Chapter 2 Filing requirements.

Burlington Hydro Inc. 2021 Electricity Distribution Rates Application EB-2020-0007 Exhibit 8 Page 12 of 32

Filed: October 30, 2020

8.4 RETAIL SERVICE CHARGES

2 Retail services refer to services provided by a distributor to retailers or customers related to the

3 competitive supply of electricity as set out in the Retail Settlement Code. Current retail service

4 rates and charges were established on a generic basis.

5

1

6 On November 29, 2018, the OEB issued its Report of the Ontario Energy Board: Energy

7 Retailer Service Charges², which set out the OEB's conclusions following the review of energy

retailer service charges. The final charges and accounting guidance were set out in the OEB's

Decision and Order, to be effective May 1, 2019.³

9 10 11

8

BHI is not proposing (i) any changes to the level of the rates and charges, or (ii) the introduction

12 of new rates and charges.

13 14

16

17

18

19 20 On February 14, 2019, the OEB issued its Decision and Order on Energy Retailer Service

15 Charges⁴. The report stated that the rates are subject to an adjustment mechanism using the

annual adjustment factor applied in the OEB's incentive regulation mechanism. As of the date of

filing, the OEB had not issued the annual adjustment factor for 2021 rates; and as such BHI has

not updated the Retail Service Charges on its Proposed Tariff of Rates and Charges. BHI will

update these when the annual adjustment factor is available; and before the OEB renders a

decision on this Application.

2122

23

24

25

In the OEB's Decision and Order in the matter of energy retailer service charges effective May

1, 2019, it was noted that "electricity distributors that currently record the revenues and costs

associated with the RCVAs are expected to continue to do so until their next rebasing

application. At rebasing, the balances will be disposed of and the RCVAs will be eliminated."5

2627

28

BHI intends to dispose of the balances in USoA accounts 1518 RCVA - Retail and 1548 RCVA

- STR and eliminate these variance accounts. This is discussed further in Exhibit 9. BHI has

- 2 requirement.

Burlington Hydro Inc. 2021 Electricity Distribution Rates Application EB-2020-0007 Exhibit 8 Page 14 of 32 Filed: October 30, 2020

8.5 REGULATORY CHARGES

- 2 The Wholesale Market Service ("WMS") rate is designed to allow distributors to recover costs
- 3 charged by the IESO for the operation of the IESO-administered markets and the operation of
- 4 the IESO-controlled grid.

5

1

- 6 The Rural or Remote Electricity Rate Protection ("RRRP") program is designed to reduce costs
- 7 for eligible customers located in certain rural or remote areas where the cost of distributing
- 8 electricity is higher.

9

- 10 The Standard Supply Service Charge ("SSSC") is set by the OEB as an administrative fee
- 11 payable by customers who purchase electricity directly from their distributor.

12

- 13 These rates are set by the OEB on a generic (i.e., province-wide) basis. This Application reflects
- the current WMS rate of \$0.0030/kWh, Capacity Based Recovery ("CBR") rate of \$0.0004/kWh,
- 15 RRRP rate of \$0.0005/kWh, and SSSC of \$0.25. These are the most recent rates approved by
- 16 the OEB.6

.

⁶ Ontario Energy Board, *Decision and Order in the matter of Regulatory Charges Effective January 1, 2020*, EB-2019-0278 (December 19, 2019), p12

Burlington Hydro Inc. 2021 Electricity Distribution Rates Application EB-2020-0007 Exhibit 8 Page 15 of 32 Filed: October 30, 2020

8.6 SPECIFIC SERVICE CHARGES

2 BHI is not requesting a new specific service charge or a change to the level of an existing 3 charge.

4 5

1

BHI is proposing modifications to its Tariff of Rates and Charges to distinguish between the specific service charge for pole attachments for carriers and non-carriers as follows:

6 7 8

9

10

1. Change the description of its existing pole attachment charge ("Specific Charge for wireline access to the power poles - \$/pole/year) on page 8 of its current Tariff of Rates and Charges filed as Appendix B to this Exhibit 8 to:

11 "Specific Charge for wireline access to the power poles (carriers) - \$/pole/year", and

- 12 2. Add an additional line item under "Other" as follows:
- 13 "Specific Charge for wireline access to the power poles (non-carriers) - \$/pole/year"
- 14 The OEB determined new wireline pole attachment charges which applied to carriers in its
- 15 Report of the Ontario Energy Board – Wireline Pole Attachment Charges dated March 22, 2018,
- where carriers are defined in Appendix A.⁷ The applicable charge effective September 1, 2018 16
- was \$28.09 per pole per year. Effective January 1, 2019 the charge was \$43.63 per pole per 17
- 18 year which is adjusted annually based on the OEB's inflation factor commencing January 1,
- 19 2020. Effective January 1, 2020, the charge increased to \$44.50 as identified on BHI's Current
- 20 Tariff of Rates and Charges filed as Appendix B. BHI will update this rate on its Proposed Tariff
- 21 of Rates and Charges filed as Appendix C, when the annual adjustment factor is available from
- 22 the OEB; and before a decision is rendered on this Application

- 24 BHI's existing Tariff of Rates and Charges issued April 16, 2020 does not specify the charge
- 25 applicable to non-carriers and as such, BHI proposes to add this line item on its Tariff of Rates
- 26 and Charges. The current rate is \$22.35 per pole per year and is identified on BHI's Proposed
- 27 Tariff of Rates and Charges filed as Appendix C to this Exhibit 8.

Burlington Hydro Inc. 2021 Electricity Distribution Rates Application EB-2020-0007 Exhibit 8 Page 16 of 32 Filed: October 30, 2020

- 1 BHI does not have any rates or charges that are included in their Conditions of Service but do
- 2 not appear on its OEB-approved tariff sheet.
- 3 BHI confirms that the revenue from the total of the specific service charges in the 2021 Test
- 4 Year corresponds with the revenue recorded under Other Revenues as identified in Table 51 of
- 5 Exhibit 3.

6

8.6.1 Wireline Pole Attachment Charge

- 7 As stated above, the OEB set a province-wide wireline pole attachment charge of \$28.09 and
- 8 \$43.63 per pole per year for carriers effective September 1, 2018 and January 1, 2019
- 9 respectively. The charge effective January 1, 2019 is adjusted annually based on the OEB's
- 10 inflation factor. This charge is to apply to all licensed distributors that have not received OEB
- 11 approval for a distributor-specific pole attachment charge.⁸ BHI is not pursuing a utility-specific
- 12 pole attachment charge for carriers in this Application and proposes to adopt the province-wide
- 13 wireline pole attachment charge for carriers.
- 14 BHI's last rebasing application was in 2014 at which time it was charging the province wide pole
- 15 attachment charge of \$22.35 per pole per year. The specific service charge revenues
- 16 associated with this pole attachment charge were recorded as a revenue offset. As such, with
- 17 the increase in the province-wide wireline pole attachment charge for carriers effective
- 18 September 1, 2018, BHI would be collecting incremental revenue as compared to that which
- 19 was approved in rates. In a letter issued March 22, 20189, the OEB instructed distributors to
- 20 record the excess incremental revenue as of September 1, 2018 until the effective date of its
- 21 rebased rates in a new variance account related to pole attachment charges. It also directed
- 22 distributors to refund the closing balance in the distributor's next cost of service application.

- 24 The OEB provided accounting guidance in its letter Accounting Guidance on Wireline Pole
- 25 Attachment Charges, dated July 20, 2018; and created a new variance account, Account 1508 –
- 26 Sub Account Pole Attachment Revenue Variance to record the incremental revenue arising
- 27 from the changes to the pole attachment charge. This account attracts carrying charges. BHI

⁸ EB-2015-0304

1 8.7 LOW VOLTAGE SERVICE RATES

- 2 BHI is not a fully or partially embedded distributor and therefore does not incur low voltage
- 3 charges.

Burlington Hydro Inc. 2021 Electricity Distribution Rates Application EB-2020-0007 Exhibit 8 Page 19 of 32 Filed: October 30, 2020

1 8.8 SMART METER ENTITY CHARGE

- 2 On March 1, 2018, the OEB issued its Decision and Order regarding the Independent Electricity
- 3 System Operator / Smart Metering Entity Smart Metering Charge 2018-2022¹⁰. This Decision
- 4 approved the Smart Metering Charge ("SMC") to be levied and collected by the IESO in its
- 5 capacity as the Smart Metering Entity ("SME"), effective January 1, 2018. The current SMC is
- 6 \$0.57 per smart meter per month, a reduction from the previous SMC of \$0.79.

- 8 BHI has followed the accounting guidance provided in the OEB's letter *Updated Guidance on*
- 9 Smart Metering Entity Charge, issued March 23, 2018.

¹⁰ EB-2017-0290

Filed: October 30, 2020

8.9 LOSS ADJUSTMENT FACTORS

- 2 BHI has calculated its proposed Supply Facilities Loss Factor ("SFLF"), distribution and total
- 3 loss factors for the 2021 Test Year in Tab "App.2-R_Loss Factors" of the OEB Chapter 2
- 4 Appendices filed as live Excel file
- 5 Attachment2_Main_OEB_Chapter2Appendices_BHI_10302020.

6

10 11

12

13

1415

BHI confirms it is not a fully or partially embedded distributor. BHI calculated the SFLF by dividing "the wholesale kWh at the virtual meter on the primary side of the transformer at the interface with the transmission grid" by "the wholesale kWh at the metering installations on the secondary or low voltage side of the transformer at the interface with the transmission grid" (i.e., the loss of electricity between the transformer stations and BHI's wholesale meter points).

16

17 18 BHI is proposing a total distribution loss factor of 1.0382 as identified in Table 9 below. Since the proposed loss factor is less than 5% BHI is not required to provide an explanation of, or

19 justification for, the level of the loss factor.

- 1 BHI provides a detailed reconciliation of customer class revenue and other revenue to total
- 2 revenue requirement for the 2021 Test Year in Table 13 below. BHI's Service Revenue
- 3 Requirement for the 2021 Test Year is made of:

4

5

8

- \$36,044,573 revenue from distribution rates;
- (\$514,689) transformer allowance
- \$1,691,087 other revenue

Table 13 – Reconciliation of Customer Class Revenue and Other Revenue

Class	Revenue from Distribution Rates	Transformer Allowance	Base Revenue Requirement	Other Revenue	Service Revenue Requirement
Residential	\$22,177,594	\$0	\$22,177,594	\$1,074,288	\$23,251,883
GS<50 kW	\$4,750,309	\$0	\$4,750,309	\$191,141	\$4,941,451

BHI provides a reconciliation of its base revenue requirement in the 2021 Test Year against its proposed rates in Table 14 below. This table and the associated calculations are provided in Tab "13. Rate Design" in the OEB's Revenue Requirement Workform filed as Attachment16_2020RRWF_BHI_10302020. BHI confirms that the test year demand/consumption and the proposed rates recover the base revenue requirement to serve the forecasted customers and demand/consumption, subject to rounding of \$81.

Burlington Hydro Inc. 2021 Electricity Distribution Rates Application EB-2020-0007 Exhibit 8 Page 27 of 32

Filed: October 30, 2020

- 1 Further details are provided in the OEB's Tariff Schedule and Bill Impacts model, filed as
- 2 Attachment22_Tariff_Schedule_and_Bill_Impact_Model_BHI_10302020, which identifies
- 3 existing rates and proposed changes to rates, and calculates detailed bill impacts including:

4 5

- % change in distribution excluding pass-through costs (e.g., DVAs) "Sub-Total A",
- % change in distribution "Sub-Total B";
- % change in delivery "Sub-Total C"; and
- % change in total bill.

9

- 10 Rates and charges input into the Tariff Schedule and Bill Impacts model have been rounded to
- 11 the decimal places as shown on BHI's current and proposed Tariff of Rates and Charges.

12 8.12.1 Residential Customer at 10th Percentile

- 13 BHI provides the bill impacts for a residential customer consuming at the lowest 10th percentile
- of consumption in Table 15 above and in the OEB's Tariff Schedule and Bill Impacts model. The
- 15 total bill impact for this customer is 4.5%. The lowest 10th percentile of consumption
- 16 corresponds to 295 kWh per month.

17 18

- BHI completed a residential class consumption segmentation analysis for the Application and
- provides a description of the method used to derive this 10th consumption percentile below.

20

- a) BHI identified the number of active residential customers who consumed electricity
- continuously from January 1, 2019 to December 31, 2019. This produced 56,325
- records.
- b) The annual consumption of these 56,325 customers was sorted from lowest to highest:
- and the annual consumption of the 5,628th customer (consumption at the 10th
- percentile) was identified as 3,536 kWh.
- 27 c) The average monthly consumption of the customer at the 10th percentile of 295 kWh was
- determined by dividing the annual consumption of 3,536 kWh by twelve months.

Burlington Hydro Inc. 2021 Electricity Distribution Rates Application EB-2020-0007 Exhibit 8 Page 28 of 32 Filed: October 30, 2020

1 8.13 RATE MITIGATION

2 8.13.1 Residential Rate Design

- 3 BHI transitioned all of its residential customers to fully fixed rates effective May 1, 2019.
- 4 8.13.2 Mitigation Plan Approaches
- 5 BHI confirms that a rate mitigation plan is not required as no customer class is experiencing a
- 6 total bill increase of greater than 10% as identified in Table 15 above.

8.13.3 Rate Harmonization Mitigation Issues

8 Rate harmonization does not apply to BHI.

In the green shaded cells, enter billing detail for wholesale transmission for the same reporting period as the billing determinants on Sheet "3. RRR Data". For Hydro One Sub-transmission Rates, if you are charged a combined Line and Transformation Connection rate, please ensure that both the Line Connection and Transformation Connection columns are completed. If any of the Hydro One Sub-transmission rates (column E, I and M) are highlighted in red, please double check the billing data entered in "Units Billed" and "Amount" columns. The highlighted rates do not match the Hydro One Sub-transmission rates approved for that time period. If data has been entered correctly, please provide explanation for the discrepancies in rates.

EB-2019-0023

RESIDENTIAL SERVICE CLASSIFICATION

This classification applies to low voltage connection assets that operate at 750 volts or less and supply electrical energy to residential customers where such energy is used exclusively in separately metered living accommodation. Customers shall be residing in single dwelling units that consist of a detached house or one unit of a semi-detached, duplex, triplex, or quadruplex house, with residential zoning. Separately metered dwellings within a town house complex or apartment building also qualify as residential customers. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

GENERAL SERVICE LESS THAN 50 KW SERVICE CLASSIFICATION

This classification applies to low voltage connection assets that operate at 750 volts or less and supply electricity to general service customers whose monthly average peak demand during a calendar year is less than, or forecast by BHI to be less than, 50 kW. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

GENERAL SERVICE 50 TO 4,999 KW SERVICE CLASSIFICATION

This classification applies to general service customers with a monthly average peak demand during a calendar year equal to or greater than, or is forecast by Burlington Hydro Inc. to be equal to or greater than, 50 kW but less than 5,000 kW. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of WMS - Sub-account CBR Class B is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to WMP, customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION

This classification applies to low voltage connection assets that operate at 750 volts or less and supply electricity to general service customers whose monthly average peak demand during a calendar year is less than, or forecast by Burlington Hydro Inc. to be less than, 50 kW and the consumption is unmetered. Such connections include cable TV power packs, bus shelters, telephone booths, traffic lights, railway crossings, etc. The customer will provide detailed manufacturer information/documentation with regard to electrical demand/consumption of the proposed unmetered load. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

RESIDENTIAL SERVICE CLASSIFICATION

This classification applies to low voltage connection assets that operate at 750 volts or less and supply electrical energy to residential customers where such energy is used exclusively in separately metered living accommodation. Customers shall be residing in single dwelling units that consist of a detached house or one unit of a semi-detached, duplex, triplex, or quadruplex house, with residential zoning. Separately metered dwellings within a town house complex or apartment building also qualify as residential customers. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

GENERAL SERVICE 50 TO 4,999 KW SERVICE CLASSIFICATION

This classification applies to general service customers with a monthly average peak demand during a calendar year equal to or greater than, or is forecast by Burlington Hydro Inc. to be equal to or greater than, 50 kW but less than 5,000 kW. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of WMS - Sub-account CBR Class B is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to WMP, customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION

This classification applies to low voltage connection assets that operate at 750 volts or less and supply electricity to general service customers whose monthly average peak demand during a calendar year is less than, or forecast by Burlington Hydro Inc. to be less than, 50 kW and the consumption is unmetered. Such connections include cable TV power packs, bus shelters, telephone booths, traffic lights, railway crossings, etc. The customer will provide detailed manufacturer information/documentation with regard to electrical demand/consumption of the proposed unmetered load. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

microFIT SERVICE CLASSIFICATION

This classification applies to an electricity generation facility contracted under the Independent Electricity System Operator's microFIT program and connected to the distributor's distribution system. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.
