

IN THE MATTER OF the Ontario Energy Board
Act 1998, S.O. 1998, c. 15, (Schedule B);

AND IN THE MATTER OF an a proceeding
initiated by the Ontario Energy Board to
determine methodologies for commodity pricing,
load balancing and cost allocation for natural gas
distributors.

NOTICE OF INTERVENTION

OF THE

SCHOOL ENERGY COALITION

1. The School Energy Coalition applies for intervenor status in this proceeding.

General Interest of the Intervenor

2. The School Energy Coalition (“SEC”) is a coalition established to represent the interests of all Ontario publicly-funded schools in matters relating to energy regulation, policy, and management. It is made up all seven of the major school-related organizations, representing all of the school boards, and all levels of school management, and through them representing the approximately 5000 schools and about 2 million students in Ontario. The primary goal of these organizations is to promote and enhance public education for the benefit of all students and citizens of Ontario.
3. The intervenor’s members have a significant interest in the activities of regulated utilities and their affiliates in the province, due to the severe financial implications those activities have on school boards, their students and the people of the province of Ontario. Utility costs are one of the most significant cost pressures facing school boards. The cost of energy services to the intervenor’s members is currently in excess of \$360 million, and has increased rapidly over the last five years. To produce balanced budgets in the face of ever increasing utility costs, school boards have repeatedly been forced to cut essential programs and services to the detriment of the students and the public of the province of Ontario.
4. As this proceeding involves natural gas distributors across the province, all of SEC's member schools and students may be affected.

Issues to be Addressed

5. SEC is intervening to review and assess the various options for standardizing the QRAM methodologies and load balancing functions. SEC is also interested in the cost allocation as between the delivery and gas supply functions.
6. The foregoing summary is intended to be illustrative but not exhaustive. SEC will continue to review the evidence in the proceeding as the record develops, and will advise parties of any further areas of interest/concern prior to the hearing.

The Intervenor's Intended Participation

7. The School Energy Coalition intends to participate in any pre-hearing procedures, including interrogatories or technical conferences, and settlement conferences. SEC also intends to participate in the oral hearing of this matter, and in written or oral submissions, as well as any other parts of the process that the Board should order.

Counsel/Representative

8. The School Energy Coalition requests that a copy of all documents filed with the Board by each party to this proceeding be served on the Applicant, and on the Applicant's counsel and case manager as follows:

Costs

9. The School Energy Coalition intends to apply for recovery of its costs reasonably incurred in the course of its intervention in this proceeding. The School Energy Coalition has participated in many past natural gas and electricity proceedings in Ontario, including the Natural Gas Forum, consultations, rate cases, and other processes and hearings, and has been found eligible to be paid its reasonably incurred costs in all of those proceedings.
10. The School Energy Coalition is eligible for a cost award because it "primarily represents the interests of consumers (e.g. ratepayers) in relation to regulated services". School boards are one of the largest groups of non-industrial energy consumers in the province, and their energy costs have a direct impact on the education of millions of Ontario children. The formation of the School Energy Coalition ensured that all representatives of the interests of schools participated jointly in OEB proceedings.
11. SEC is not ineligible by reason of any of the criteria contained in section 3.05 of the Practice Direction on Cost Awards.

Respectfully submitted on behalf of the School Energy Coalition this 2nd day of July, 2008.
