Re: EB-2020-0181 EGI 2021 Rates Phase 2 – Incremental Capital Module

Dear Ms. Long:

Pollution Probe is in receipt of the notice from Enbridge for the above noted proceeding and hereby applies for intervenor status and requests that it be eligible for the recovery of reasonably incurred costs for its participation. Pollution Probe was an active Intervenor in Phase 1 and supported Enbridge's request to proceed in a phased manner.

Pollution Probe is a frequent intervenor in Board proceedings and a copy of our current Annual Filing can be found on the Board's website at the following location:

<http://www.rds.oeb.ca/HPECMWebDrawer/Record/647508/File/document>

Goals and Objectives

Pollution Probe intends to focus on the Incremental Capital Module (ICM) and related evidence including the Asset Management Plan. Pollution Probe is an Intervenor in the London Replacement Project proceeding and that is a project Enbridge has applied for ICM treatment in this application.

Intention to Seek Cost Awards

Pollution Probe is a not-for-profit charitable organization. We receive individual donations as well as funding for consumer and research projects, such as on community energy planning, future of natural gas and regulated utility innovation, from a variety of public and private sources. Without the prospect of an award of costs, Pollution Probe's ability to participate in the consultation process would not be possible.

Pollution Probe has been an active and valuable participant in proceedings before the Ontario Energy Board and will continue to coordinate its activities, where appropriate, with other parties which represent consumer, municipal and environmental interests in Ontario.

Pollution Probe respectfully requests your acceptance of this request to participate and confirmation that it will be eligible for its costs.
