Regarding: 2021 Rate Adjustment

Dear Mrs. Christine E. Long,

In response to the Ontario Energy Board's (OEB) letter that establishes the process for the implementation of the inflation factor for use in the 2021 rate adjustment applications, the OEB has calculated the 2021 inflation factor for electricity distributors to be 2.2%.

The OEB is allowing utilities the discretion of electing the calculated IPI level per the OEB-approved methodology or a lower value.

Lakefront Utilities Inc. is requesting the calculated value of 2.2% for its January 1, 2021 rates.

Should the board have questions regarding this matter please contact me at dpaul@lusi.on.ca

Respectfully Submitted,
