Dear Ms. Long

Re: Cooperative Hydro Embrun Inc.2021 IRM Applications
Inflation Parameters EB- 2020-0011

In its November 9th, 2020 letter to stakeholders, the Ontario Energy Board's (OEB), allowed LDCs the discretion of electing the calculated IPI level per the OEB-approved methodology (offset by the applicable stretch factor and other adjustments for some plans) or a lower value for use in their 2021 rate adjustment application.

In response to that letter, Cooperative Hydro Embrun Inc. is advising the OEB that it has opted to use the calculated IPI level per the OEB-approved methodology of 2.2% in its 2021 IRM application before the board and for the purpose of rate making.

Yours truly,

A handwritten signature in blue ink, appearing to be 'B. Lamarche', is written over a faint, circular blue ink stamp.
