## **BY EMAIL AND RESS**

**Ms. Christine Long**

Board Secretary

Ontario Energy Board

2300 Yonge Street, Suite 2700, P.O. Box 2319

Toronto, Ontario M4P 1E4

Dear Ms. Long:

**Re: EB-2020-0198 – Toronto Waterfront Relocation Project**

We are writing on behalf of Environmental Defence to request intervenor status and costs eligibility in the above proceeding as a leading environmental organization that represents both the public interest in environmental protection and the interests of consumers whose energy bills can be reduced through Integrated Resource Planning, increased energy efficiency, and other means.

### **Nature and Scope of Intended Participation and Interest in Proceeding**

Environmental Defence wishes to file interrogatories, participate in the hearing, review and test the evidence, make submissions, and seek a cost award. Environmental Defence's interest in this proceeding is in promoting both the public interest in environmental protection and the interests of consumers whose energy bills can be reduced through the means outlined above.

Environmental Defence wishes to address important issues relating to this mandate, such as:

- Whether it is reasonable, appropriate, and legal for Waterfront Toronto to be made to bear the costs of the project;
- Whether a portion of the costs should be considered driven by reliability versus the Waterfront Toronto driver;
- Whether the proposed cost is reasonable and appropriate;
- Whether the proposed route is reasonable and appropriate;
- Whether Enbridge appropriately considered alternatives, including IRP alternatives that could have lowered the cost of the project;
- Whether a smaller pipe could have allowed alternative designs or routing options; and

- Whether this project has been considered in an appropriately holistic way in relation to other past, current and future projects in the KOL loop.

## **Oral Hearing**

Environmental Defence requests the opportunity to make submissions on whether an oral hearing should be held after receiving interrogatory responses. In our submission, there is insufficient information on the record to decide whether an oral hearing is required or for intervenors to make submissions on that point.

### *A. Mandate and Objectives of Environmental Defence*

Environmental Defence has been working since 1984 to protect Canadians' environment and human health. Environmental Defence's mandate and objective is to challenge, and inspire change in government, business and people to ensure a greener, healthier and prosperous life for all. Its vision is to create a world Canadians are proud to pass on to their children.

### *B. Membership and Constituency*

Environmental Defence is supported by many thousands of donors across the province and country. It sees its constituency as Canadians who are concerned about the environment and the legacy that we will pass on to our children.

### *C. Types of Programs and Activities that Environmental Defence Carries Out*

Environmental Defence has been highly successful in its public interest advocacy on energy issues. Environmental Defence's environmental work, on issues ranging from toxic chemicals to clean beaches, has led to concrete improvements in the lives of Canadians. For example, the dangerous chemical Bisphenol A ("BPA") is now banned in baby bottles in Canada due to concerns first raised by Environmental Defence in 2007. For many years, Environmental Defence has participated in the federal government's Chemicals Management Plan.

Environmental Defence is also the coordinator of Blue Flag Canada, which certifies beaches so that Ontario families can enjoy this public resource. It also co-founded Blue Green Canada with the United Steelworkers, which promotes green energy initiatives that have positive employment and economic impacts.

Environmental Defence also publishes reports and guides in the area of energy conservation, efficiency, and policy. For example, it has created an interactive online tool to help energy consumers reduce their bills through energy efficiency initiatives. Some further publications include:

- *Building an Ontario Green Jobs Strategy*
- *Ontario's Electricity System, a Background*

- *Canada's Methane Gas Problem: Why strong regulations can reduce pollution, protect health, and save money*
- *Powering up efficiency to get the conservation framework right*
