OEB staff further notes that for Account 1580 Variance WMS Sub-account CBR Class A, a combined balance of \$4,199 has been transferred to cell BJ25 in the 2021 Rate Generator. The 2019 continuity schedules show an interest balance of \$168 for Parry Sound and (\$780) for Lakeland for this Account.

- a) Please confirm that in the 2021 IRM Rate Generator, a combined interest amount of (\$612) should have been itemized in cells BJ25 for Account 1580 Variance WMS – Sub-account CBR Class B.
- b) If so, OEB staff will make the necessary updates. If not, please explain why.
- c) OEB staff is unable to reconcile the amount of (\$390,991) transferred into Account 1595 (2019). Please explain this difference and any further variances to the amounts approved for disposition.

# Commodity Accounts 1588 and 1589

Typically, large balances are not expected for Account 1588 as it should only hold the variance between commodity costs based on actual line losses and commodity revenues calculated using values for line losses approved by the OEB in the utility's last rebasing application. Based on RRR data filed for Lakeland Power Distribution for Account 4705 Cost of Power, OEB staff calculates the annual net activity (i.e. transactions plus principal adjustments) from the DVA Continuity Schedule as a percentage of annual Account 4705 to be as follows:

|      | Net Activity in Account 1588 (\$) | Account 4705 (\$) | % of net activity compared to Account 4705 |
|------|-----------------------------------|-------------------|--|
| 2019 | (504,638)                         | 18,598,237        | -2.7%                                      |

- a) Please confirm this calculation or provide a revised calculation.
- b) For 2019, the percentage is greater than +/-1%. Please explain why the Account 1588 activity would be high in consideration of line losses.
- c) Please confirm whether Lakeland Power is requesting interim or final disposition of Group 1 Deferral and Variance accounts.

## Remaining LRAMVA Balances

Lakeland Power has requested to recover lost revenues up to and including the 2018 CDM program year.

- a) Please discuss if Lakeland Power plans to seek further recovery of lost revenues from the 2019 CDM program year.
- b) If so, please update the LRAMVA work forms for both rate zones to include 2019 CDM savings and the associated lost revenues. Please confirm that 2019 LRAMVA amounts have only been calculated up to the time when Lakeland Power fully transitioned to a fixed residential charge.

 If not, please confirm that the 2018 LRAMVA balance will be the final amount sought for recovery from Account 1568 – LRAMVA.

(2) OEB's letter, 2021 Inflation Parameters, issued November 9, 2020,

OEB staff has updated the 2021 Rate Generator the Price Escalator on Tab 16 (cell B12) with a placeholder value of 2.20%, representing the inflation factor calculated by the OEB-approved methodology for 2021.

In light of the continued uncertainty regarding the COVID-19 pandemic, the OEB allowed utilities to elect the calculated IPI level per the OEB-approved methodology (offset by the applicable stretch factor and other adjustments for some plans) or a lower value for the 2021 rate year. Utilities also have the discretion to forego the inflationary increase entirely. The letter noted that utilities filing rate application for May 1, 2021, shall make an election by February 5, 2021.

a) Please confirm that Lakeland Power intends to file a letter on the record of this proceeding, indicating its election for the 2021 inflation factor to be applied to its 2021 rates, by the February 5, 2021, deadline.
