This letter to OEB in regards of file#EB-2020-0246 and would like to let you know my opinion in regards of your decision to change a seasonal class rate.

First of all i would like to thanks all you for good operation.

My opinion is if you change a rate and increase my payments for electricity go up this will affect on my life because i won't be able to use electricity as much as i wish for normal live and have to cut my spends on other live essential demands. I hope you will consider again the rate and make it more reasonable at such difficult time of live.
