Evaluation Advisory Committee (EAC)**

**Re: Updated DSM Evaluation Plan – 2021-2022 Calendar Years
EB-2015-0245**

The Ontario Energy Board (OEB) has posted an updated natural gas demand side management (DSM) Evaluation, Measurement and Verification (EM&V) Plan. The OEB's Evaluation Contractor, consulting firm DNV-GL, updated the [previously issued EM&V Plan](#) to provide recommended evaluation activities for the OEB to consider undertaking over the final two years of the current DSM term.

When making decisions on future DSM evaluation activities, the OEB will consider a number of inputs, including the Evaluation Contractor's recommendations, input from the Evaluation Advisory Committee, as well as the value, timeliness and resources required to complete potential evaluation activities.

Questions about the OEB's DSM evaluation activities should be directed to Josh Wasylyk at josh.wasylyk@oeb.ca or 416-440-7723.

Yours truly,
