RE: EB 2020-0049 Ottawa River Power Corporation Inflation Factor Election

Dear Ms. Long,

On November 9th, 2020, the Ontario Energy Board issued a letter to establish the process for the implementation of the inflation factor for use in 2021 rate adjustment applications. The OEB calculated the 2021 inflation factor for electricity distributions to be 2.2%.

Ottawa River Power Corporation confirms that it will be utilizing the calculated value of 2.2% less its assigned stretch factor of 0.15% for a net inflation adjustment of 2.05%.

Should the board have any questions or concerns, please find my contact information below.

Sincerely,

Justin Allen
