The proposed 100% rate increase for seasonal cottage users is obscene. The average cottage will be paying more than \$700 a year more. Hydro One have not invested in their infrastructure in the area of our cottage for decades and we are subject to regular and prolonged power outages due to their negligence. My math indicates the 78,000 of cottagers will be adding close to 50M\$ additional revenue to Hydro One. Stop this nonsense and spread costs throughout all your users rather than penalizing the seasonal users.
