I have received your notice to consider the next steps in eliminating Hydro Ones seasonal rate class. In it, it reports that the distribution rates currently charged seasonal customers do not appropriately reflect the cost to serve them. Over the past 21 months I have paid 79.56% of my total bill for delivery charges and the HST on same. I am more than willing to share the figures with you so you can have the people that made the above statement explain what percentage they would feel is fair . I was not made aware of any public hearing dealing with this decision but would certainly like to add my comments to the hearing determining how long you think you should spread out the increase , which I figure will be approx !00% based on my usage and your chart. I am certainly glad that your decisions "serve the public interest" because I don't hink I could afford it if you actually were looking out for Hydro One.
