MY camp is on Nepewassi Lake. You found loop hole to charge us more money when Ontario has too much energy and you sell it off outside of Ontario in order to show an increased need. This is also during a time where north america is focusing on green energy. The cost increase makes no sense. You will be pushing customers away. On top of this, you already charge me a monthly fee even in the months that I turn the main electrical panel off - a monthly fee for the privilege of having electricity. So this increase is on top of that fee you already have tried to justify charging. In the very least you need to drop the first fee. It costs me more to have electricity run to my camp than what I use in electricity.
