The Hydro One letter indicated my average monthly electricity use to be 265.33 kWh over the last 12 months. Taken over a longer period (33 months) the average was 355 kWh per month. Using the example given for 350 kWh per month, the new monthly cost, moving to R2 class, would be \$153.49, an increase of 53.2%. That increase is exorbitant and extremely unfair. I could understand an increase of 20 or 25% but 53.2% is unreasonable.
