I would like to gather a better understanding of the large increase in costs of my Hydro bill 1102 Foxhollow Dr Kennisis Lake. Already, I pay over \$2,000 for a seasonal property that is only used 5 months a year. Electricity is barely used since we BBQ most of the season, and it is light until 10pm in the season. Is the cost increase as a result of debt repayment? If so why are the seasonal residents responsible for repayment of past mistakes by previous governments? or is this as a result of general operations, maintenance, fix asset infrastructure required to maintain the operations. Please also comment as to why for the same operations the bills in Quebec are a quarter of what they are in Ontario .
