While I understand the reasons for the elimination of the seasonal rates I feel the categories for the monthly consumption are unfair. My monthly consumption for 2020 and for most prior years is approximately 65 kWh. Based on the figures provided in the notice I will be paying an extra \$100.20 for being 15kWh over the next lower level of use which would be \$54.06.

I would like to see more than the 3 levels of monthly use shown.
