With us using an average of 77 kwh a month our Delivery costs would go up over 100 per cent a month. What are you people thinking. we use only 77 kwh and the rate goes up 100% and some one uses 1000 kwh and the rate goes up 28%. Is this equitable? What are the people at HydroOne smoking? Please OEB dont let them raise these rates by such a ridiculous amount.

Nancy and Andy Berga
