I strongly object to this application. As a seasonal owner July and August are the 2 months used by my husband and I. Rates for the year are being based on these two months. We are in our 70's, now fully retired, and plan to use the cottage more often. We have worked our whole lives to reach this point but this is in jeopardy. We cannot be the only people in this situation that will take a big financial hit to our pensions. It seems very unfair to use seasonal properties to increase your profits. Also we expect to face a large hydro rate increase to our residential property once the government funded program is ended.
