Re Case no EB2020-0246 Ontario Energy Board Hearing Seasonal Rate case

To whom it may concern we own and operate a Seasonal Resort business called Lakeside Cottages. Hydro has informed all Seasonal businesses and folks with Cottage homes that they intent to withdrawal the seasonal rate for hydro.

This will have a grave effect on our business and for other folks with seasonal homes. At this time we are all trying to get though a pandemic crises we really do not need an increase in hydro rates and in taking away seasonal rates for business owners and cottage homes.

We urge you to carry on with the seasonal rates until such times that the economy is in much better situation, right now as many businesses may never recover from the pandemic. We are all facing hard challenging times right now this is not the time to increase or make changes to rates more should be done to help seasonal businesses and folks with cottage homes.

Thank you for your time.
