As I write this I am awaiting further information from hydro one. My point being that not enough time was allowed to think about, gather and investigate the information as provided and then fashion a response in time to submit by the March 15th deadline. Already in my first phone call to hydro one I was informed that information relating to “ possible” mitigation measures is different or has been changed since the letter that I received just yesterday about this matter. Whether or not I receive in a timely manner the information I have requested and will be requesting remains to be seen . David Wunker
