Re: [REDACTED]
Eliminating seasonal class rate

Here we go again - being penalized for living in northern Ontario where there are lesser people living. Once we are moved to a higher rate because of lower seasonal customers, we will never be moved back once all the people have come up, purchased seasonal properties, but still not making us high enough to be considered as medium or high density areas. Of course, where there are more people, they will still stay in a lower rate area because of population density. My wife and I are not in favour of still rate hike in the seasonal hydro rates. Respectfully, please consider those of us in the north who make everyone welcome at our cottages, but do not want to be penalized for living in the north.
