I am a cottage owner located on Burma Lane in Lansdowne. The cottage is located on Charleston Lake. I am writing to you at this time to state my disapproval of eliminating the Seasonal Rate Class. Our cottage is truly a seasonal cottage using only 48.67kWh average monthly electricity. Eliminating the seasonal class will increase our bill by 100%. This has a huge impact on being able to afford keeping a cottage within our family. A cottage that has been in the family since the early 70s. I ask that you please reconsider and allow the true seasonal cottage owners to keep paying a seasonal rate.
