I would like to thank Hydro-One for the letter I received with regards to consideration to eliminate the Seasonal Rate class (EB-2020-0246). My cottage is located on Limerick lake, Ontario. South of Bancroft in Limerick Township.

Reading the letter sent to me, I understand that I have a right to information and also a right to to be involved in the process. I would like to be involved in this process but first I would like to exercise my right to be informed. All of Limerick Lake has electrical power supplied by an underwater cable that runs down the lake. Each customer is fed electricity by feeder lines under water to each property. To my knowledge, in the 16 years we have been on the lake the underwater cable has never failed. I would like to request from Hydro One the following:

- 1) How many time in the last ten years have they repaired the hydro cable that runs down the lake?
- 2) How many new lines have been added to the underwater cable for a new electrical hook up?
- 3) How much money was charged to each new customer for the hook up service?
- 4) How many Limerick lake cottagers are currently hooked up to the underwater hydro cables on Limerick lake.

I look forward to receiving this information.

Respectfully
Tim Mellor
