It is totally appalling to me that the OEB and Hydro One are considering eliminating the Seasonal Rate Class... under this new class my property would move to the residential low density R2 class...which would mean i would see increases to my bills that are excessive with a more than 54 percent increase !

This Province has the highest electricity rates in the country and has seen industries disappear because they can no longer compete! Now you want residents to leave?

It is absolutely unacceptable to be considering this type of change ...Hydro One is already non competitive ...needs to restructure itself not change it pricing structure and pass issues on to the customer!!

Enough is Enough!

A very concerned seasonal cottager who has paid very high electricity bills ongoingly....

Josée Lachance
