I own a seasonal property and have just received notice of the pending reclassification from "seasonal" to "low density." In doing my analysis from the information in the letter I received dated Feb. 10 and having discussions with Hydro One it would appear my increase going forward based on 2020 delivery cost will be in the area of \$500.00 . While I can appreciate the necessity for an increase in revenue I find this to be an extremely unreasonable amount of increase especially to take effect at one time. If there is a need for this large of an increase , I believe it should be phased in over a least two years.

Regards,

Pete
