EB-2020-0246

We are seniors on a pension that built our retirement home in 2010 and became full time residents in 2013. Hydro One has just informed us that we are classified a "seasonal customer" and will be moved to a "low density (R2) customer" resulting in an increase of over \$50.00 per month. Like many seniors we conserve as much as possible and use approximately 5440 kWh pure year. We are not isolated as we have over a dozen full time neighbors within one km of our house. This huge increase could very well put us out of our home. Please put a stop to this application. Kindest Regards.
